Abstract: The U.S. Department of
Education has been working with State
Directors of adult education and local
providers to document the learning
gains of adult education participants.
Because little is known about the
effectiveness of adult basic education
(ABE) programs for first-level learners,
this is an exploratory study. Hence, we
are developing measures to describe the
operational and instructional
characteristics of ABE programs and are
testing methods of measuring outcomes.
The programs participating in the study
were selected based on information
collected in previous case studies that
had evidence of good instruction, where
teachers had been trained in a specific
model for delivering adult education
instruction, and where there was
evidence of effective program
operations. Respondents are program
participants who voluntarily enroll in
federally funded adult basic education
classes.

On August 7, the Office of Fossil Energy (FE) of the Department of Energy (DOE) received an application from SET to transmit electric energy from the United States to Canada. SET proposes to arrange for the delivery of electric energy to Canada over transmission facilities owned by Basin Electric Power Cooperative, Bonneville Power Administration, Citizens Utilities, Detroit Edison Company, Eastern Maine Electric Cooperative, Joint Owners of the Highgate Project, Maine Electric Power Company, Maine Public Service Company, Minnesota Power, Inc., Minnkota Power Cooperative, New York Power Authority, Niagara Mohawk Power Corporation, Northern States Power and Vermont Electric Transmission Company.

The construction of each of the international transmission facilities to be utilized by SET, as more fully described in the application, has previously been authorized by a Presidential permit issued pursuant to Executive Order 10485, as amended.
