SUPPLEMENTARY INFORMATION: The Final Environmental Impact Statement (FEIS) for the Southern Terminus (Section 3X) of the Natchez Trace Parkway is presented in abbreviated form. The abbreviated FEIS includes responses to public comments, errata, and a Statement of Findings, for Wetlands. The abbreviated FEIS, when combined with the Draft Environmental Impact Statement, Natchez Trace Parkway, Section 3X, Southern Terminus (May 8, 1998), comprises the complete Final Environmental Impact Statement (FEIS). Only minor revisions to the DEIS were necessary.

The FEIS presents a proposal and two alternative locations for the Southern Terminus of the Natchez Trace Parkway. Alternative 1, the no action alternative, would construct an interchange at U.S. 84/98 and make that point the southern terminus of the parkway. The proposal, alternative 2, would extend the parkway another 4.2 miles from U.S. 84/98 toward Natchez to terminate at Liberty Road, where an interchange would be constructed. Alternative 3 would extend the parkway about 4.3 miles from U.S. 84/98 to terminate with an interchange

at Sargent Prentiss Drive. Alternative 3 is the only alternative which would not require the acquisition of some additional property. In every alternative, parkway users would enter or exist the parkway utilizing existing city streets to reach the city center or other locations.

The FEIS evaluates the environmental consequences associated with the proposed action and the other alternatives on local traffic and transportation routes, cultural resources, wetland, visual quality, visitor experience, economics and land use, and nearby residents and businesses, amount other topics.
