**Proposed Data Collections Submitted for Public Comment and Recommendations**

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the Assistant CDC Reports Clearance Officer on (404) 639-7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques for other forms of information technology. Send comments to Seleda M. Perryman, Assistant CDC Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 14 days of this notice.

**Proposed Projects**

1. *The National Health and Nutrition Examination Survey (NHANES)*—(0920-0237)—Revision—The National Health and Nutrition Examination Survey (NHANES) has been conducted periodically since 1970 by the National

Center for Health Statistics, CDC. The NHANES will begin again in February 1999 and will be conducted on a continuous, rather than periodic, basis from that point on. The plan is to sample about 5,000 persons annually. They will receive an interview and a physical examination. A dress rehearsal of 555 sample persons is needed to test computer-assisted personal interviews (including translations into Spanish), examination protocols, automated computer systems and quality control procedures. Participation in the dress rehearsal and main survey will be completely voluntary and confidential.

NHANES programs produce descriptive statistics which measure the health and nutrition status of the general population. Through the use of questionnaires, physical examinations, and laboratory tests, NHANES studies the relationship between diet, nutrition and health in a representative sample of the United States. NHANES monitors the prevalence of chronic conditions

and risk factors related to health such as coronary heart disease, arthritis, osteoporosis, pulmonary and infectious diseases, diabetes, high blood pressure, high cholesterol, obesity, smoking, drug and alcohol use, environmental exposures, and diet. NHANES data are used to establish the norms for the general population against which health care providers can compare such patient characteristics as height, weight, and nutrient levels in the blood. Data from NHANES can be compared to those from previous surveys to monitor changes in the health of the U.S. population. NHANES will also establish a national probability sample of genetic material for future genetic research for susceptibility to disease.

Users of NHANES data include Congress; the World Health Organization; Federal agencies such as NIH, EPA, and USDA; private groups such as the American Heart Association; schools of public health; private businesses; individual practitioners; and

administrators. NHANES data are used to establish, monitor, and evaluate recommended dietary allowances, food fortification policies, programs to limit environmental exposures, immunization guidelines and health education and disease prevention programs. Approval was received on 5/29/98 for only a pilot test of the revised survey—without the genetic research component. This submission is time-sensitive and requests emergency approval just so the dress rehearsal and the start of the survey will not be delayed. Another submission requesting three year approval for the dress rehearsal and the full survey will be filed on a normal, non-emergency schedule.

The survey description, contents, and uses are the same as those in the **Federal Register** notice for the pilot test. The total cost to respondents for the period covered by this notice and the related request for OMB approval (from 2/99–1/02) is estimated at \$1,889,440.
