## Environmental Assessment Prepared for Proposed Central Gulf Sale 172 on the Gulf of Mexico Outer Continental Shelf

**AGENCY:** Minerals Management Service, Interior.

**ACTION:** Notice of availability of the environmental assessment on Proposed Central Gulf of Mexico Lease Sale 172.

**SUMMARY:** The Minerals Management Service (MMS) has prepared an environmental assessment (EA) for the proposed annual Lease Sale 172 for the Central Planning Area of the Gulf of Mexico Outer Continental Shelf.

In this EA, MMS has reexamined the potential environmental effects of the proposed action and alternatives based on any new information regarding potential impacts and issues that was not available at the time the Final Environmental Impact Statement (FEIS) for Lease Sales 169, 172, 175, 178, and 182 was prepared.

In summary, no new significant impacts were identified for proposed Lease Sale 172 that were not already assessed in the FEIS for Lease Sales 169, 172, 175, 178, and 182. As a result, MMS determined that a supplemental EIS is not required and prepared a Finding of No New Significant Impact.

**FOR FURTHER INFORMATION CONTACT:**

Public Information Unit, Information Services Section at number below. You may obtain single copies of the EA from the Minerals Management Service, Gulf of Mexico OCS Region, Attention: Public Information Office (MS 5034), 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana 70123-2394 or by calling 1-800-200-GULF.

## Preparation of an Environmental Assessment for Proposed Lease Sale 174 in the Western Gulf of Mexico (1999)

**AGENCY:** Minerals Management Service.  
**ACTION:** Preparation of an Environmental Assessment.

**SUMMARY:** The Minerals Management Service (MMS) is beginning preparation of an environmental assessment (EA) for proposed lease Sale 174 (scheduled for August 1999) in the Western Gulf of Mexico Planning Area. In January 1997, MMS issued a Call for Information and Nominations/Notice of Intent to Prepare an EIS (Call/NOI) for the four proposed Western Gulf of Mexico sales in the current 5-year leasing program. In 1998, MMS prepared a single environmental impact statement (EIS) for all four sales. The multisale Final EIS, filed in May 1998, included an analysis of a single, "typical" sale, and a cumulative analysis that included the effects of holding all four sales, as well as the cumulative effects of the long-term development of the planning area. The MMS stated in the EIS that an EA would be prepared for each lease sale after the first sale covered in the EIS (Sale 171).

The preparation of this EA is the first step in the prelease decision process for Sale 174. The proposal and alternatives for Sale 174 were identified by the Director of MMS in January 1997 following the Call/NOI and were analyzed in the Western Gulf multisale EIS, which is available from the Gulf of Mexico OCS Region's Public Information Office at 1-800-200-GULF. The proposed action analyzed in the multisale EIS was the offering of all available unleased acreage in the Western Gulf of Mexico Planning Area, with the following exceptions: Blocks A-375 (East Flower Garden Bank) and A-398 (West Flower Garden Bank) in the High Island Area, East Addition, South Extension, designated as a national marine sanctuary; and Blocks 793, 799, and 816 in the Mustang Island Area, identified by the Navy as needed for testing equipment and for training mine warfare personnel. The proposal to be addressed in this EA has been revised to the following extent: two additional blocks or portions of these blocks (High Island Area, East Addition, South Extension, Block A-401 and High Island, South Addition, Block A-513), which lie partially within the Flower Gardens National Marine Sanctuary, are deferred from the proposed action in

light of the President's June 1998 withdrawal of all Marine Sanctuaries from oil and gas leasing. The proposed action includes existing regulations and proposed lease stipulations designed to reduce environmental risks. The EA will also analyze alternatives to exclude blocks near biologically sensitive topographic features, as well as the no action alternative. The MMS may also consider deferring blocks beyond the U.S. Exclusive Economic Zone, in the area referred to as the northern portion of the Western Gap, as talks between the U.S. and Mexico are currently underway regarding the establishment of a continental shelf boundary in this area. The analysis in the EA will reexamine the potential environmental effects of the proposal and alternatives based on any new information regarding potential impacts and issues that was not available at the time the Final EIS was prepared.

The MMS requests interested parties to submit comments regarding any such new information or issues that should be addressed in the EA to Minerals Management Service, Gulf of Mexico OCS Region, Office of Leasing and Environment, Attention: Regional Supervisor (MS 5400), 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123-2394 by December 7, 1998. After completion of the EA, MMS will determine whether to prepare a Finding of No New Significant Impact (FONNSI) or a supplemental EIS. The MMS will then prepare and send consistency determinations to the affected States to determine whether the proposed sale is consistent with federally-approved State coastal zone management programs, and will send a proposed Notice of Sale to the Governors for their comments on the size, timing, and location of the proposed sale. The tentative schedule for the steps in the prelease decision process for Sale 174 are listed below: Comments due to MMS, December 7, 1998; EA/FONNSI or Supplemental EIS, March 1999; Proposed Notice of Sale sent to Governors, March 1999; Consistency Determinations sent to States, March 1999; Final Notice of Sale in **Federal Register**, July 1999; Sale, August 1999.
