Title: Coordination Best Practices Project.

OMB Number: Not yet assigned.

Expiration Date: Three years from approval date.

Type of Request: New collection.

Abstract: Participation in continuous and comprehensive health care, coupled with good nutrition, has been shown to improve pregnancy outcomes and the health status of infants, children, and breastfeeding mothers. In recognition of the positive organizational and clinical outcomes that can result from improved coordination between the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) and Community/Migrant Health Centers (C/MHCs), and between the WIC Program and Indian Health Service (IHS) facilities, Section 17(j) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(j)), as amended by the Healthy Meals for Healthy Americans Act of 1994, calls for WIC services to be provided at substantially more C/MHCs and for improved coordination of WIC services with those offered by IHS facilities. The purpose of the Coordination Best Practices Project is to identify 30-40 successful model coordination/collaboration efforts between the WIC Program and the C/MHCs funded by the Department of Health and Human Services' Bureau of Primary Health Care, and between the WIC Program and IHS programs and to showcase these in a "Best Practices Handbook." The handbook will be designed to provide information and to stimulate interaction and discussion between WIC, C/MHCs, and IHS programs. The handbook will also contain a tool for local sites to use in conducting an assessment of their current coordination efforts and in developing a plan to increase coordination/collaboration efforts.

Information for this study will be collected in two stages of telephone

interviews with staff from WIC clinics, C/MHCs and IHS facilities across the country. First, descriptive information will be collected through telephone interviews from 100-150 sites, each consisting of a C/MHC or IHS facility and the WIC clinic with which they coordinate or collaborate. These sites will be identified from recommendations provided by a variety of agencies and organizations with knowledge of WIC and health care programs. Information from this first stage of data collection will be used to identify 60 potential model sites. These 60 sites will be contacted again by telephone to collect more in-depth information on the collaboration and coordination of the WIC and primary health care services at the local level. Finally, these data will be analyzed to identify 30-40 "best practice" models, which will be described in the Best Practices Handbook. Ten sites will be profiled in greater detail.

Affected Public: Federal, State and local governments, local nonprofit organizations including local WIC agencies, C/MHCs, and IHS facilities.

Estimated Number of Respondents: One staff member from each of the 100-150 sites in the first round of interviews. In the second round of interviews, one staff member from the C/MHC or IHS facility and one staff member of the coordinating/collaborating WIC clinic will be interviewed for each of the 60 sites.

Estimated Time Per Response: Phone interviews will average 30 minutes per site for the first round of 100-150 sites. Interviews will average 60 minutes for the second round of 60 sites with two interviews per site.

Estimated Total Annual Burden on Respondents: 195 hours.

Dated: February 2, 1998.

Yvette S. Jackson,

Acting Administrator, Food and Consumer Service.
