[Project No. 2666-007 Maine]

Bangor Hydroelectric Company; Notice of Availability of Final environmental Assessment

March 12, 1999.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR Part 380 (Order No. 486, 52 F.R. 47897), the Office of Hydropower Licensing reviewed the application for a new license for the existing Medway Hydroelectric Project. The Medway Project is located on the West Branch Penobscot River in the town of Medway, Penobscot County, Maine.

On October 28, 1998, the Commission staff issued and distributed to all parties

a draft environmental assessment on the project, and requested that comments be filed with the Commission within 45 days. Comments were filed and are addressed in the final environmental assessment (FEA).

The FEA contains the staff's analysis of potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The FEA is available in the Public Reference Room, Room 2A, of the Commission's offices at 888 First Street, N.E., Washington, D.C. 20426. The FEA may also be viewed on the web at <http://www.ferc.fed.us/online/rims.htm> (please call (202) 208-2222 for assistance).
