

previously analyzed in the FEIS and would present different potential environmental impacts due to the use of different propellants. The size and number of solid rocket motors to be used on each launch vehicle will be proposed by the launch vehicle contractors, Lockheed Martin and the Boeing Company. The solid propellant to be used in the strap-on motors will most likely consist of ammonium perchlorate, aluminum, and organic binder. Details regarding propellant composition, propellant masses, and emissions impacts will be included in the SEIS. Because of the projected differences in the environmental impacts between the systems previously examined and the new alternative, the Department of the Air Force will prepare a supplement to the EELV FEIS.

The SEIS will analyze the potential environmental impacts resulting from the use of solid rocket motors on EELV vehicles. Both government and commercial launches will be analyzed to assess cumulative effects. The total EELV launch rate including launches using solid rocket motors are not expected to exceed those addressed in the FEIS. The first launch of a solid rocket motor variant is anticipated in 2001 at CCAS and 2002 at VAFB. EELV launches using solid rocket motors are not expected to exceed 7 to 12 per year from VAFB and 14 to 21 launches per year from CCAS.

The no-action alternative to the proposed action is to limit EELV launches from Air Force facilities to those launch vehicle variants previously analyzed in the FEIS. That is, the Government could choose not to permit the use of strap-on solid rocket motors. This would result in the use of only the systems considered in the June 1998 ROD.

Environmental issues to be analyzed in the SEIS include, but are not limited to: air quality, hazardous materials processing, hazardous waste, stratospheric impacts, health and safety, launch debris, launch noise, sonic boom impacts, construction modifications due to program changes from FEIS, and effects of new launch variants on biological species, ground waters, and all other natural and cultural resources.

The Air Force is soliciting public input and comments concerning the environmental aspects to be addressed in the SEIS. To ensure that the Air Force has sufficient time to fully consider public response, written comments need to be received no later than April 26, 1999. Comments should be mailed to: SMC/AXFV, Attn: Ted Krawczyk, Environmental Engineer, 2420 Vela Way, Suite 1467, El Segundo, CA

90245-4659. Comments may also be sent via fax (310) 363-1503, and e-mail: Theodore.Krawczyk@losangeles.af.mil.

The SEIS is expected to be available for public review in Summer 1999. A notice of availability will be published in the **Federal Register** announcing issuance of the draft SEIS.
