[FHWA Docket No. FHWA-98-4498; FHWA-95-5]

#### **Comprehensive Truck Size and Weight Study; Availability of Volume III, Scenario Analysis**

**AGENCY:** Federal Highway Administration (FHWA), DOT.

**ACTION:** Notice; request for comments.

**SUMMARY:** The FHWA is announcing the availability of a draft of Volume III, Scenario Analysis of the report for the Comprehensive Truck Size and Weight (TS&W) Study (October 1998) for review and comment. The document will be mailed to individuals that have previously expressed an interest in the study.

Volume III presents a description of the analytical framework used to evaluate a set of alternative TS&W options selected for review by the DOT. Data and analytical tools have been developed to evaluate critical impact areas: highway agency costs (pavement preservation, bridge protection and geometric requirements), externalities (safety of the system, environmental quality, energy consumption and traffic flow) and economic impact (rail competitiveness and shipper costs).

For each of five scenarios, the impacts, as delineated above, have been assessed and compared to a status quo baseline. These findings are presented in Volume III. The DOT identified three illustrative core scenarios for initial evaluation. In addition, two policy proposals, initiated by external groups, were targeted for analysis. Scenarios were specified using a building block approach which includes configuration, highway network, and geographic options.

**DATES:** Comments must be received by March 16, 1999 in order to be considered for inclusion in the final draft of the Volume III document.
