NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget (OMB) Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

1. Type of submission, new, revision, or extension: Revision.
2. The title of the information collection: Proposed Rule, 10 CFR part

52, Appendix C, Design Certification Rule for the AP600 Design.

3. The form number if applicable: Not applicable.

4. How often the collection is required: On occasion.

5. Who will be required or asked to report: Designers of commercial nuclear power plants, electric power utilities, and any person eligible under the Atomic Energy Act to apply for a construction permit for a nuclear power plant.

6. An estimate of the number of responses: No applications are expected during the next three years.

7. The estimated number of annual respondents: No applications are expected during the next three years.

8. An estimate of the total number of hours needed annually to complete the requirement or request: Approximately 24 additional burden hours (8 hours each for 3 additional reports that result from changing the requirement from an annual to quarterly report). No reports are expected during the next three years.

9. An indication of whether section 3507(d), Public Law 104-13 applies: Applicable.

10. Abstract: The proposed rule would add appendix C to 10 CFR part 52 to allow interested parties to reference a certified AP600 design in an application for a construction permit or combined license. In general, the information collection requirements are the same as those contained in 10 CFR part 52. The addition of appendix C to 10 CFR part 52 adds a small incremental reporting burden.

The NRC will use the reported information to monitor changes to the facility and gain an understanding of how the as-built facility conforms to the certified design.

Submit, by June 21, 1999, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the submittal may be viewed free of charge at the NRC Public Document Room, 2120 L Street, NW (lower level), Washington, DC. The proposed rule indicated in "The title of the information collection" is or has been published in the **Federal Register** within several days of the publication

date of this **Federal Register** Notice. Instructions for accessing the electronic OMB clearance package for the rulemaking have been appended to the electronic rulemaking. Members of the public may access the electronic OMB clearance package by following the directions for electronic access provided in the preamble to the titled rulemaking.

Comments and questions should be directed to the OMB reviewer by June 21, 1999. Erik Godwin, Office of Information and Regulatory Affairs (3150-0151), NEOB-10202, Office of Management and Budget, Washington DC 20503.

Comments can also be submitted by telephone at (202) 395-3087.

The NRC Clearance Officer is Brenda Jo. Shelton, 301-415-7233.

Dated at Rockville, Maryland, this 14th day of May 1999.

For the Nuclear Regulatory Commission.
