8. At the beginning of your comments (e.g., as part of the "Subject" heading), be sure to properly identify the document you are commenting on. You can do this by providing docket control number OPP-00599, along with the name, date and **Federal Register** citation.

II. Background

The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) section 2(ee) defines "to use any registered pesticide in a manner inconsistent with its labeling" (misuse) as use of " * * * any registered pesticide in a manner not permitted by the labeling * * *," and goes on to list a number of exceptions to the term. Use includes storage, transportation, handling, pre-application activities, mixing and loading, worker notification and worker protection, application, post-application activities and disposal.

Statements on the pesticide labeling may be interpreted by users different from what the registrant or EPA intended when the labeling was accepted. If EPA believes that misuse has occurred, a court may have to decide whether a product's labeling statements are clear enough for the user

to understand how to lawfully use the product. Pesticide labeling needs to clearly identify what is required of the user to handle and apply a pesticide safely. The Agency is engaged in numerous efforts to improve labels in general (e.g., the Consumer Labeling Initiative), as well as specific areas of the labeling of pesticide products (e.g., bee precautionary labeling and pesticide drift labeling).

III. Summary of Draft PR Notice

Following is an excerpt from draft PR Notice which summarizes its key points:

Mandatory statements, which commonly use imperative verbs such as "must" or "shall," either require action or prohibit the user from taking certain action. *Advisory statements* simply provide information, either in support of the mandatory statements or about the product in general. *To ensure that the intent of each labeling statement is clear, mandatory statements need to be clearly distinguishable from advisory statements.*

Currently, labeling provisions are enforced by taking into consideration all the information presented on the label and reading advisory statements in the context of the entire label. Problems can arise when advisory statements are either vague or ambiguous in meaning, or are inconsistent with other labeling. In the past, advisory statements have commonly used suggestive verbs such as "should," "may," or "recommend" to help the user achieve the directed behavior, but sometimes these statements can be unclear as to whether they are mandatory or advisory. In a recent misuse enforcement action, for example, the person charged with the violation argued that advisory statements misled him into taking action which was inconsistent with the mandatory statements.

The Agency seeks to improve mandatory and advisory labeling statements by providing guidance (see Appendix to the PR Notice) on how they can best be written. This guidance consists of two steps. First, mandatory statements are generally written in imperative or directive terms (such as "shall," "must," "do this," "do not") so that a typical user will understand that these statements direct the user to take or avoid certain actions. Second, advisory statements are best written in descriptive or nondirective terms to support the mandatory statements or provide information. Suggestive terms such as "should," "may," or "recommend" may be confusing or ambiguous, or potentially conflict with mandatory labeling statements; thus, they are to be avoided whenever possible. EPA realizes that the use of

descriptive terms for advisory statements is not appropriate for every situation and that there are times where it may be necessary to use "should," "may," "recommend," or similar words. However, in most cases it is best to state advisory labeling statements in straightforward, descriptive language.

IV. Questions/Issues for Comment

While comments are invited on any aspect of the draft PR Notice, EPA is particularly interested in comments on the following questions:

1. Are the descriptions of mandatory and advisory labeling statements clear and complete? If not, how should they be changed?
2. Is the basic policy that mandatory and advisory statements should be distinguishable from each other clear and adequate? If not, how can this policy be better expressed?

V. Policies Not Rules

The draft PR Notice discussed in this notice is intended to provide guidance to EPA personnel and decision-makers, and to the public. As a guidance document and not a rule, this policy is not binding on either EPA or any outside parties. Although this guidance document provides a starting point for EPA decisions, EPA will depart from this policy where the facts or circumstances warrant. In such cases, EPA will explain why a different course was taken. Similarly, outside parties remain free to assert that this policy is not appropriate for a specific pesticide or that the specific circumstances demonstrate that this policy should be abandoned.

EPA has stated in this notice that it will make available revised guidance after consideration of public comment. Public comment is not being solicited for the purpose of converting this guidance document into a binding rule. EPA will not be codifying this policy in the Code of Federal Regulations. EPA is soliciting public comment so that it can make fully informed decisions regarding the content of this guidance.

The "revised" guidance will not be an unalterable document. Once a "revised" guidance document is issued, EPA will continue to treat it as guidance, not a rule. Accordingly, on a case-by-case basis EPA will decide whether it is appropriate to depart from the guidance or to modify the overall approach in the guidance. In the course of commenting on this guidance document, EPA would welcome comments that specifically address how the guidance document can be structured so that it provides meaningful guidance without imposing binding requirements.
