An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0436.

Title: Equipment Authorization—Cordless Telephone Security Coding.

Form Number: N/A.

Type of Review: Extension of currently approved collection.

Respondents: Businesses or other for-profit entities.

Number of Respondents: 200.

Estimated time per response: 1 hour.

Total Annual Burden: 200 hours.

Total Annual Cost: \$2,800.

Needs and Uses: Cordless telephone security features protect the public switched telephone network from unintentional line seizure and telephone dialing. These features prevent unauthorized access to the telephone line, the dialing of calls in response to signals other than those from the owner's handset and the unintentional ringing of a cordless telephone handset. Use of the cordless telephone security features reduces the harm caused by some cordless telephones to the "911" Emergency Service Telephone System and the telephone network in general.

OMB Control Number: 3060-0387.

Title: On-Site Verification of Field Disturbance Sensors—Section 15.201(d).

Form Number: N/A.

Type of Review: Extension of currently approved collection.

Respondents: Businesses or other for-profit entities.

Number of Respondents: 200.

Estimated time per response: 18 hours.

Total Annual Burden: 3,600 hours.

Total Annual Cost: \$40,000.

Needs and Uses: Commission rules permit the operation of field disturbance sensors in the low VHF region of the spectrum. In order to monitor non-licensed field disturbance sensors operating in the low VHF television bands, a unique procedure for on-site equipment testing of the systems is required to ensure suitable safeguards for the operation of these devices. Data is retained by the holder of the equipment authorized issued by the Commission and made available only at the request of the Commission.
