

- a. All the relevant parties have agreed in writing.
- b. Statutory requirements have been met.
- c. The guidelines listed above have been followed.

These cases have included institutions (University of Nebraska, Lincoln), units of the National Park Service (Carlsbad Caverns NP and Guadalupe Mountains NM), and states (Minnesota and Iowa).

2. Regional consultations

Historical and cultural factors, and therefore issues concerning the definition and disposition of culturally unidentifiable human remains, vary significantly across the United States. For example, issues in the Southeast, where most Indian tribes were forcibly removed during the 19th century, are very different from those in the Southwest where many Indian tribes remain on their ancestral lands. Similarly, issues in the Northeast and California differ significantly from those in the Great Plains. Therefore, it is reasonable to look for regional solutions that best fit regional circumstances.

The Review Committee recommends a process in which the Federal agencies, institutions and Indian tribes within a region consult together and propose the most appropriate disposition solutions for that region.

As with joint recommendations, any proposed regional disposition must meet both statutory requirements and the guidelines listed above.
