SUPPLEMENTARY INFORMATION:

I. Abstract

The International Trade Administration's (ITA), Import Administration, AD/CVD Enforcement, administers the U.S. antidumping and countervailing duty law. Under section 780 of the Tariff Act of 1930, as amended (19 U.S.C. 1677i), a domestic producer of an article that is like a component part or a downstream product may petition the Department of Commerce to designate the downstream product for monitoring. Such a petition must allege and support the proposition that the imposition of antidumping or countervailing duties has resulted in a diversion of exports of the component part into increased production and exportation to the United States of such downstream product. Section 780, and the Department's regulation (19 CFR 351.223), require that the petition, among other things, identify the downstream product to be monitored, the relevant component part, and the likely diversion of foreign exports of the component part into increased exports of the downstream product to the United States. ITA will evaluate the petition and will issue either an affirmative or negative ''monitoring'' determination.

Type of Review: New.

Agency: Corporation for National and Community Service.

Title: Longitudinal Research on AmeriCorps Member Outcomes.

OMB Number: None.

Agency Number: None.

Affected Public: AmeriCorps Members and Respondents in Comparison Groups.

Total Respondents: Approximately 10,350.

Frequency: One time.

Average Time Per Response: AmeriCorps Members: 30 minutes; Comparison Group Respondents: 45 minutes.

Estimated Total Burden Hours: 3,606 hours.

Total Burden Cost (capital/startup): None.

Total Burden Cost (operating/maintenance): None.

Description: The Corporation seeks approval of baseline survey forms for the longitudinal study of outcomes associated with participation in AmeriCorps, the national service program. A central purpose of the agency and its programs is to foster citizenship and development for those who serve in AmeriCorps. The proposed study includes members in the State/National and the National Civilian Community Corps AmeriCorps programs, and their counterparts in comparison groups. There were no comments received during the initial 60-day public comment period. Since our original submission, there has been a change in both the number of respondents and the overall burden hours. The number of respondents appears to have increased substantially but this is due to a screening phone call that will be made to approximately 4,850 potential respondents for less than five minutes. Thus, not including this brief call, the number of true respondents (5,550) is actually lower than originally anticipated.

This decrease in the number of respondents is due to two changes: (1) Exclusion of the Volunteers in Service to America (VISTA) participation in the study; and (2) elimination of the Retrospective Study of AmeriCorps members. These studies are not part of the final design. Thus, the overall response in burden hours has decreased. Also contributing to a decrease in the burden hours is the change to a self-administered baseline for members rather than a phone interview.

Even though the net burden is lower, the decreases are somewhat offset by an increase in the number of comparison respondents for the State and National programs. A national comparison group of those who have inquired about serving in AmeriCorps has been identified. This will strengthen the design and the ability of the study to address causality for the national study.
