Antidumping Duty Order; Certain Hot-Rolled Flat-Rolled Carbon-Quality Steel Products From Japan

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of antidumping duty order.

EFFECTIVE DATES: June 29, 1999.

FOR FURTHER INFORMATION CONTACT: John Totaro at (202) 482-1374, Antidumping and Countervailing Duty Enforcement Group III, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Tariff Act), are to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations codified at 19 CFR Part 351 (April 1, 1998).

Scope of the Order

The products covered by this order are certain hot-rolled flat-rolled carbon-quality steel products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers) regardless of thickness, and in straight lengths, of a thickness less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (i.e., flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm and of a thickness of not less than 4 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of this order.

Specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free ("IF")) steels, high strength low alloy ("HSLA") steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum.

Steel products included in the scope of this order, regardless of Harmonized Tariff Schedule of the United States ("HTSUS") definitions, are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2

percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 1.80 percent of manganese, or
- 1.50 percent of silicon, or
- 1.00 percent of copper, or
- 0.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 1.25 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.012 percent of boron, or
- 0.10 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.41 percent of titanium, or
- 0.15 percent of vanadium, or
- 0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of this order unless otherwise excluded. The following products, by way of example, are

Although the HTS subheadings are provided for convenience and Customs purposes, the written description of the scope of the order is dispositive.

Antidumping Duty Order

In accordance with section 735(a) of the Tariff Act, the Department made its final determinations that certain hot-rolled flat-rolled carbon-quality steel products from Japan are being sold at less than fair value. See *Notice of Final Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Flat-Rolled Carbon-Quality Steel Products From Japan*, 64 FR 24329, (May 6, 1999). This determination included a finding that critical circumstances existed with respect to Kawasaki Steel Corporation (Kawasaki) and the "All Others" exporter/producer category, but not with respect to Nippon Steel Corporation and NKK Corporation.

On June 18, 1999, the International Trade Commission (the Commission) notified the Department of its final determination pursuant to section 735(b)(1)(A)(i) of the Tariff Act that an industry in the United States is materially injured by reason of less-than-fair-value imports of subject merchandise from Japan. The Commission further found that critical circumstances do not exist with respect to imports of the subject merchandise from Japan. As a result, the Department will direct Customs officers to refund any cash deposits made or bonds

posted, pursuant to the Department's final determination of critical circumstances, on merchandise produced/exported by Kawasaki and by any of the "All Others" companies which were entered on or after November 21, 1998 (90 days prior to the Department's preliminary determination publication date of February 19, 1999) and before February 19, 1999.

Moreover, in accordance with section 736(a)(1) of the Tariff Act, the Department will direct Customs officers to assess, upon further advice by the Department, antidumping duties equal to the amount by which the normal value of the merchandise exceeds the export price (or constructed export price) of the merchandise for all relevant entries of hot-rolled carbon-quality steel products from Japan. These antidumping duties will be assessed on all unliquidated entries of certain hot-rolled flat-rolled carbon-quality steel products from Japan entered, or withdrawn from warehouse, for consumption on or after February 19, 1999, the date on which the Department published its notice of preliminary determination in the **Federal Register** (64 FR 8291). Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins as noted below. The "All Others" rates apply to all exporters of subject hot-rolled flat-rolled carbon-quality steel products not specifically listed. Imports of hot-rolled flat-rolled carbon-quality steel products, not described above under "Scope of the Order," will not be covered by this order. The weighted-average dumping margins are as follows:

Producer/manufacturer/exporter (company)	Cash deposit rate (margin in percent)
Nippon Steel Corporation	19.65
NKK Corporation	17.86
Kawasaki Steel Corporation	67.14
All Others	29.30

This notice constitutes the antidumping duty order with respect to certain hot-rolled flat-rolled carbon-quality steel products from Japan. Interested parties may contact the Department's Central Records Unit, room B-099 of the main Commerce building, for copies of an updated list of antidumping duty orders currently in effect. These orders are published in accordance with section 736(a) of the Tariff Act of 1930, as amended.

Dated: June 23, 1999.
Richard W. Moreland,
Acting Assistant Secretary for Import Administration.
