**DEPARTMENT OF TRANSPORTATION**

**Office of the Secretary**

**Office of Transportation Policy and Federal Aviation Administration, Civil Aero Medical Institute; Notice of Request for Extension and Revision of a Currently Approved Information Collection**

**AGENCY:** Office of the Secretary, DOT and Federal Aviation Administration.

**ACTION:** Notice and request for comments.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended) this notice announces the Department of Transportation, DOT, intentions to request an extension for and revision to a currently approved information collection.

**DATES:** Comments on this notice must be received by no later than August 30, 1999.

**ADDRESSES:** Four (4) copies of any comments should be sent to the Safety and Health Division (P-140), Office of Transportation Policy, Office of the Secretary, U.S. Department of Transportation, 400 7th Street, SW., Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Mr. Robert M. Clarke, Office of the Secretary, Office of Transportation Policy Development (P-100), Department of Transportation, at the address above. Telephone: (202) 366-2916.

**SUPPLEMENTARY INFORMATION:**

*Title:* Infant Travel Survey.

*OMB Control Number:* 2105-0536.

*Expiration Date:* June 30, 1999.

*Type of Request:* Extension and revision of a currently approved information collection.

*Abstract:* Children 2 years of age and younger are exempt from the FAA requirement that they be restrained in a seat during transport airplane takeoffs and landings. In February 1997, the White House Commission on Aviation Safety and Security recommended that this exemption be eliminated, requiring instead that those children be placed in a separate aircraft seat equipped with an approved Child Restraint System (CRS). In May 1995, in response to Section 522 of the Federal Aviation Administration Authorization Act of 1994, Pub. L. 103-305, the FAA published a report on CRS use in transport category aircraft. A subsequent reanalysis of this issue conducted by staff in the OST Policy Office has yielded different conclusions, because certain of the assumptions used

in the FAA study were deemed untenable.

FAA issued an ANPRM in April 2, 1998 (the comment period closed June 28), seeking technical comments about what types of CRS could/should be used in transport category aircraft. Responses to those questions provide needed technical information relative to implementation of CRS aboard transport airplanes, but economic questions related to the issue were not included in that Notice. This deficiency resulted in little information, on which to assess the validity of the assumptions used in its analysis, being received from the traveling public by the FAA.

Accordingly, there is a need to gauge the impact that requiring use of CRS would have on travelers accompanied by infants and small children, 2 years of age and less. Information needs to be obtained about the types of trips (length, purpose, mode of travel) on which such children accompany adults; the prevalence of actual CRS use, relative to air travel by infants and small children; the factors that determine whether CRS are being used for such children; and what types of changes to these travel events would result from requiring the use of CRS.

*Respondents:* This is a relatively small-scale, one-time survey that is not conducive to electronic collection techniques. Face-to-face interviews, conducted in the departure waiting lounges at hub airports, will be obtained with randomly-selected adults accompanied by infants and small children in actual air-travel status. The interview will conform to a scripted set of questions prepared for the interviewer, and the answer form will be partially machine-coded for ease of data reduction by the research team. This survey will target individual or paired adults (typically parents) travelling with infants and small children.

*Average Annual Burden per Respondent:* 5 minutes.

*Estimated Total Annual Burden on Respondents:* 74.7 hours.

The information collection is available for inspection at the Safety and Health Division (P-140), Room 10309, Office of Transportation Policy, DOT.

*Comments are invited on:* (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (b) the accuracy of the Department's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility and clarity of the information to be
