SUPPLEMENTARY INFORMATION:

History

On April 20, 1999, a proposal to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the Class E airspace at Atqasuk, AK, was published in the **Federal Register** (64 FR 19313). The proposal was necessary due to the establishment of SIAPs to RWY 06 and RWY 24 at Atqasuk, AK.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No public comments to the proposal

were received, thus the rule is adopted as written.

The area will be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1200 foot transition areas are published in paragraph 6005 of FAA Order 7400.9F, *Airspace Designations and Reporting Points*, dated September 10, 1998, and effective September 16, 1998, which is incorporated by reference in 14 CFR 71.1 (63 FR 50139; September 21, 1998). The Class E airspace designations listed in this document will be revised and published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 revises the Class E airspace at Atqasuk, AK, through the establishment of two VOR instrument approaches to RWY 06 and RWY 24. The area will be depicted on aeronautical charts for pilot reference. The intended effect of this rule is to provide adequate controlled airspace for IFR operations at Atqasuk, AK.

The FAA has determined that these regulations only involve an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore — (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Adoption of the Amendment

Revision of Class E Airspace; Adak, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revises the Class E airspace at Adak, AK. The upcoming decommission of the military Nondirectional Beacon (NDB) and commission of the new NDB/Distance Measuring Equipment (DME), along with the establishment of Global Positioning System (GPS) and NDB/DME instrument approaches at Adak, AK, have made this action necessary. Additionally, the Class E airspace descriptions at Adak, AK, have been consolidated into one description. The intended effect of this action is to update the airspace descriptions and provide adequate controlled airspace for Instrument Flight Rules (IFR) operations at Adak, AK.

SUPPLEMENTARY INFORMATION:

History

On April 20, 1999 a proposal to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the Class E airspace at Adak, AK, was published in the **Federal Register** (64 FR 19314). The proposal was necessary due to the following: (1) the Naval Air Facility (NAF) Adak ceased active military airfield operations on March 31, 1997; (2) the military tower closed and the airfield converted to an uncontrolled airport; (3) the airspace around Adak, AK, has been modified to reflect remaining navigational aids and new requirements; (4) the Adak military NDB and military Tactical Air Navigational Aid (TACAN) will be decommissioned; (5) a new FAA NDB/DME (Mount Moffett NDB/DME) will be commissioned; and (6) two new instrument approach procedures, NDB/DME and GPS, have been developed for runway (RWY) 23.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No public comments to the proposal were received, thus the rule is adopted as written.

The area will be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as a surface area for an airport are published in paragraph 6002 in FAA Order 7400.9F, *Airspace Designations and Reporting Points*, dated September 10, 1998, and effective September 16, 1998, which is incorporated by reference in 14 CFR 71.1 (63 FR 50139; September 21, 1998). The Class E airspace areas designated as an extension to a Class D or Class E surface area are published in FAA Order 7400.9F, paragraph 6004, and paragraph 6005 lists the Class E airspace areas designated as an 700/1200 foot transition area. The Class E airspace listed in this document as a surface area or extension to a surface area will be revoked and removed in the Order. The Class E airspace designations listed in this document as 700/1200 foot transition areas will be revised and published in the Order.

The Rule

This amendment to 14 CFR part 71 revises the Class E airspace at Adak, AK, due to the following: (1) the NAF Adak ceased active military airfield operations; (2) the military tower closed and the airfield converted to an uncontrolled airport; (3) the airspace around Adak, AK, has been modified to reflect remaining navigational aids and new requirements; (4) the Adak military NDB and military TACAN will be decommissioned; (5) a new FAA NDB/DME (Mount Moffett NDB/DME) will be commissioned; and (6) two new instrument approach procedures, NDB/DME and GPS, have been developed for RWY 23.

The FAA has determined that these regulations only involve an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
