

the date of such measurements, maintenance reports, and records. All reports are sent to the delegated State or Local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office.

In the Administrator's judgment, particulate matter emissions from glass manufacturing plants cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Therefore, NSPS were promulgated for this source category at 40 CFR part 60, subpart CC.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on January 5, 1999. No comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 6.5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of Glass Manufacturing Plants.

Estimated Number of Respondents: 30
Frequency of Response: Initial reports if there are new sources, and, semiannual excess emissions reports

Estimated Total Annual Hour Burden: 398 hours.

Estimated Total Annualized Capital, O&M Cost Burden: \$174,000.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection

techniques to the following addresses. Please refer to EPA ICR No. 1131.06 and OMB Control No. 2060-0054 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Office of Policy, Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460;

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Reporting and Recordkeeping Requirements for the New Source Performance Standards for Municipal Solid Waste Landfills

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: Reporting and Recordkeeping Requirements for the New Source Performance Standards for Municipal Solid Waste Landfills, OMB Control Number 2060-0220, expiration date August 31, 1999. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before August 23, 1999.

FOR FURTHER INFORMATION CONTACT:

Sandy Farmer at EPA by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download a copy of the ICR off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 1557.04.

SUPPLEMENTARY INFORMATION: *Title:* Reporting and Recordkeeping Requirements for the New Source

Performance Standards for Municipal Solid Waste Landfills (OMB Control No. 2060-0220; EPA ICR No. 1557.04) expiring 8/31/99. This is a request for extension of a currently approved collection.

Abstract: In the Administrator's judgement municipal solid waste (MSW) landfill emissions generated by decomposition of municipal solid waste deposited in an MSW landfill may reasonably be anticipated to endanger public health or welfare. Therefore, NSPS were promulgated for this source category.

All respondents must submit an initial design capacity report which includes the landfill's maximum design capacity, date of anticipated startup, and the anticipated refuse acceptance rate. If the design capacity of a new landfill is less than 2,500,000 megagrams (Mg), no further reporting or recordkeeping is required. Under certain circumstances, amended design capacity reports may be required. If the facility's design capacity is equal to or greater than 2,500,000 Mg, the owner or operator is required to determine the facility's nonmethane organic compound (NMOC) emission rate.

If the NMOC emission rate is determined to be <50 Mg/yr, using Tier 1, Tier 2, or Tier 3 calculations, no further calculation or testing is required for that year. Owners or operators of MSW landfills emitting <50 Mg NMOC per year may submit reports of NMOC emission rates yearly. However, NSPS Subpart WWW, also allow owners or operators to report less frequently. Under these provisions, the NMOC report may be accompanied by an estimation of the annual NMOC emission rate for each of the next 5 years, provided that none of the estimated rates reaches 50 Mg/yr. In this case, the owner or operator would not submit annual reports, but the estimation would be updated and resubmitted every 5 years. The owner or operator would also be required to revise the estimate in any year in which the actual waste acceptance rate for that year exceeds the waste acceptance rate upon which the previously submitted estimate is based.

Owners or operators of landfills with collection and control systems installed in compliance with the standards are not required to submit reports of NMOC emission rates. Owners or operators of affected facilities would be required to keep records of accumulated refuse and waste acceptance rates for a minimum of 5 years.

For landfills required to install collection and control systems (i.e., those emitting greater than 50 Mg/yr of

NMOC), submission of a collection and control system design plan is required. After review of the design plan and installation of the collection and control system, an initial performance test and report for the system is required. Thereafter, annual compliance reports would be required.

For control systems using an enclosed combustion device, the initial performance test would also include the average combustion temperature, and the percent reduction of NMOC achieved. For control systems using a boiler, the initial performance report would include a description of the location at which the emission stream is introduced into the boiler, and the average combustion temperature of the boiler.

For control systems using an open flare, the initial performance report would include a description and the flare type, visible emissions reading, a heat content determination, flow rate measurements, and exit velocity determinations. Where control devices other than an open flare or closed combustion device are used, owners or operators would be required to submit to the Administrator information describing the control device and parameters that will indicate its proper performance.

Following submission of the initial performance report, owners or operators would be required to keep continuous monitoring records of the parameters reported in the initial performance report and records of monthly monitoring of the collection system and quarterly monitoring of surface methane concentration. Annual compliance reports and recordkeeping would include descriptions of any periods in which the value of any of the monitored operating parameters falls outside the established ranges and any period when the collection system or air pollution control equipment malfunctioned or when the collected gas was diverted from the control device. When applicable, each owner or operator of a controlled landfill will submit a closure report to EPA within 30 days of waste acceptance cessation.

The information collected will be used by EPA personnel to ensure compliance with the NSPS and identify the sources subject to the standards. When appropriate under NSPS, Subpart WWW, each owner or operator of a controlled landfill shall submit annual reports of exceedances, gas steam diversion, control device non-operation, collection system failure, the date at installations and the location of each well or well collection system and equipment removal.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 1/5/99 (64 FR 499); no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 11.3 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or Operators of MSW landfills for which construction, modification, or reconstruction commences on or began accepting waste after May 30, 1991.

Estimated Number of Respondents: 172 each year.

Frequency of Response: quarterly, annually.

Estimated Total Annual Hour Burden: 3,379 hours.

Estimated Total Annualized Cost Burden: \$80,000.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1557.04 and OMB Control No. 2060-0220 in any correspondence.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared June 21, 1999 Through July 02, 1999 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 564-5167.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 09, 1999 (64 FR 17362).

Draft EISs

ERP No. D-AFS-L65319-OR Rating EO2, Pelican Butte Ski Area Master Development Plan, Implementation, Winema National Forest, Klamath Ranger District, Klamath County, OR.

Summary: EPA expressed environmental objections concerning insufficient information to predict impacts to water quality and air quality, especially visibility. Reductions in habitat, especially for the spotted owl, do not comply with the NW Forest Plan.

ERP No. D-BLM-J65298-CO Rating EC2, Yankee Gulch Sodium Minerals Project, To Produce Sodium Products, Piceance Basin, Right-of-Way Permit and COE Section 404 Permit, Rio Blanco County, CO.

Summary: EPA expressed environmental concerns for the protection of soil and ground water, and ensuring that impacts are monitored and mitigated.

ERP No. D-FHW-E40778-NC Rating EC2, US 74 Shelby Bypass Transportation Improvements, Construction, Funding and COE Section 404 Permit, Cleveland County, NC.

Summary: EPA is requesting further consideration of a bypass corridor to the south of the Shelby Central Business District. No particular bypass alternative to the north of Shelby is preferred by EPA, and the agency has noted
