

Burden Statement: The estimated average burden for renewing the existing notification ICR is 4.25 hours per respondent for initial notifications and 2.10 hours per respondent for subsequent notifications. These estimates for the notification ICR include all aspects of the information collection including time for reviewing instructions, searching existing data sources, gathering data, and completing and reviewing the form.

The estimated average burden for renewing the existing part A ICR is approximately 27 hours per respondent for submitting a new part A permit application and approximately 14 hours for submitting a revised part A permit application. The burden estimates for the part A ICR includes time for reading the regulations, preparing and submitting initial and revised part A permit applications, preparing and submitting justifications for changes and preparing and submitting subpart H compliance demonstrations.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of hazardous waste facilities.

Estimated Number of Respondents: For notifications, 31,125; for part A applications, 59.

Frequency of Response: Occasional.

Estimated Total Annual Hour Burden: 100,137 hours for notifications; 945 hours for part A applications.

Estimated Total Annualized Cost: \$130,725 for notifications; \$424 for part A applications.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR Nos. 261.13 (notifications) and 262.09 (part A) and OMB Control Nos. 2050-0028 and

2050-0034, respectively, in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Office of Policy, Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460; and Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503.

Dated: August 23, 1999.

Richard T. Westlund,

Acting Director, Regulatory Information Division.

Agency Information Collection Activities: Submission for OMB Review; Comment Request, NSPS Equipment Leaks of VOC in Petroleum Refineries

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: NSPS subpart GGG Equipment Leaks of VOC in Petroleum Refineries; OMB Control Number 2060-0067; expires November 30, 1999. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before September 27, 1999.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download a copy of the ICR off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 0983.06.

SUPPLEMENTARY INFORMATION:
Title: NSPS subpart GGG Equipment Leaks of VOC in Petroleum Refineries (OMB Control No. 2060-0067; EPA ICR No. 0983.06) expiring November 30, 1999. This is a request for extension of a currently approved collection.

Abstract: The New Source Performance Standards (NSPS) for

Equipment Leaks of VOC (Volatile Organic Compound) in Petroleum Refineries were proposed on January 4, 1983 and promulgated on May 30, 1984. These standards apply to the following facilities in petroleum refineries: compressors and the group of all equipment (e.g., valves pumps, flanges, etc.) within a process unit in VOC service, commencing construction, modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart GGG.

Owners or operators of the affected facilities described must make one-time-only notifications. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Monitoring requirements specific to Equipment Leaks of VOC in Petroleum Refineries provide information on which components are leaking VOCs. NSPS GGG references the compliance requirements of NSPS VV. Owners or operators are required to periodically (time period varies depending on equipment type and leak history) record information identifying leaking equipment, repair methods used to stop the leaks and dates of repair.

Semiannual reports are required to measure compliance with the standards of NSPS subpart VV as referenced by NSPS subpart GGG. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NSPS. Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records.

All reports are sent to the delegated State or Local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office. Responses to this information collection are mandatory. Section 111 of the Clean Air Act as Amended provide EPA with the authority for NSPS standards; 40 CFR part 60, NSPS subpart GGG, requires the collection of the emissions data. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting

comments on this collection of information was published on 6/4/99 (64 FR 30020); no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 57 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of Petroleum Refineries.

Estimated Number of Respondents: 48.

Frequency of Response: Initial, weekly, monthly, quarterly, semiannual.

Estimated Total Annual Hour Burden: 6,137 hours.

Estimated Total Annualized Capital, O&M Cost Burden: \$0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 0983.06 and OMB Control No. 2060-0067 in any correspondence.

Final NPDES Permit for Aquaculture Facilities and Associated, On-Site Fish Processing Facilities Operating in Idaho (ID-G13-0000)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final NPDES general permit.

SUMMARY: The Director, Office of Water, EPA Region 10, is publishing notice of the availability of the National Pollutant Discharge Elimination System (NPDES) general permit (number ID-G13-0000) for coverage of aquaculture facilities and associated, on-site fish processing facilities operating in Idaho, pursuant to the provisions of the Clean Water Act, 33 U.S.C. 1251 *et seq.* The general NPDES permit authorizes wastewater
