

analyzed in the plan. These alternatives will be developed based on internal staff discussions, public comments, and meeting with government agencies. Tentative issues for discussion include off-highway vehicle use, livestock grazing, noxious weeds, and timber harvest. One alternative will be a "no action" alternative (continuation of the present management program), based on the 1995 approved Medford RMP. Another alternative will provide for greater restrictions on current uses and potential interagency coordination to meet landscape-level management objectives. Other alternatives will provide for road and trail designations and maintenance management programs comprising various combinations of resource uses and land allocations.

The BLM is seeking information, comments, and assistance from federal, state, and local agencies and other individuals or organizations interested in or affected by the proposed action.

The analysis will be completed by an interdisciplinary team. Disciplines to be represented on the team include, but are not limited to: archaeology, anthropology, botany, fire management, fisheries, forestry, geology and minerals, hydrology, realty, recreation, wilderness, and soils.

The Federal interest has been examined and found suitable for sale under the provisions of the Federal Land Policy and Management Act (43 CFR 2711.3-3).

#### Notice of Recreation Use Restrictions and Regulations for Egin Lakes Access and Red Road Recreation Sites Adjacent and Within the Sand Mountain Wilderness Study Area (WSA), Idaho

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of recreation use restrictions for Egin Lakes Access and Red Road recreation sites adjacent and within the Sand Mountain WSA, Idaho.

**SUMMARY:** Notice is hereby given in accordance with Title 43 Group 8000-Recreation Programs, and in accordance with the principles established by the Federal Land Policy and Management Act of 1976 and the National Environmental Policy Act of 1969, that certain lands located in and adjacent to the Sand Mountain WSA which includes the area known as the St. Anthony Sand Dunes Special Recreation

Management Area (SRMA) in Fremont and Jefferson Counties, Idaho have recreation use restrictions placed upon them. Actions are implemented under the authority of 43 CFR 8364.

**DATES:** Effective date: September 1, 1999.

**ADDRESSES:** Bureau of Land Management, Upper Snake River District, Idaho Falls Field Office, 1405 Hollipark Drive, Idaho Falls, Idaho 83401, telephone (208) 524-7500.

**SUPPLEMENTARY INFORMATION:** The WSA is 21,000 acres of public land that has current vehicle and recreation use restrictions within it that were established through the **Federal Register** on August 13, 1992. Both the WSA and SRMA are within the Egin-Hamer Winter Seasonal Closure Area established through the **Federal Register** on December 16, 1997.

Recreation use in the SRMA has increased nearly 1000% from an estimated 14,000 visits in FY84 to over 136,000 visits in FY 98. The Egin Lakes Access Site alone recorded over 72,000 visits in which over 20,000 visitors were campers using the undeveloped camping area or the developed parking lot to camp. Use along the Red Road where there are numerous undeveloped recreation sites recorded over 24,000 visits in which over 2000 visitors were overnight campers.

Open campfire sites inside the Sand Mountain WSA but outside the Red Road Open Sand Campfire Area have increased tremendously in the last few years, especially around major access routes onto the open sand and around Dry Lake Bed (Hidden Lake) causing degradation of the natural values of the area. The last few years have also had non-traditional dispersed recreation uses occur on Hidden Lake which is a dry lake bed in the winter but has water throughout the spring, summer, and fall seasons. Snowmobile and Personal Water Craft users have been using the lake in the summer for water craft skinning. This activity has created safety problems for other recreation users along the lake shore and in the water. The development of the Egin Lakes access has created large gatherings of young individuals to the area. These gatherings have contributed to large beer and alcohol parties at the recreation site. Both drug and alcohol use by underage users has been documented at this site and other concentrated recreation use area within the St. Anthony Sand Dunes Special Recreation Management Area.

To reduce the litter and debris left in the recreation sites and areas along the Red Road and Egin Lakes access, and to

reduce the safety hazard presented by alcohol use the following restriction will be in effect: (1) No Person under the age of twenty-one (21) shall possess or consume any alcoholic beverage, as defined by Idaho Code Title 23-105, on Public lands in the St. Anthony Sand Dunes Special Recreation Management Area.

Maps of the areas where the restriction will apply will be available at the Idaho Falls Field Office. Signs with the rules and regulations for the SRMA will be posted at entrances into the WSA as well as at the recreation sites and areas. The new restriction will be incorporated into the existing St. Anthony Sand Dunes and Sand Mountain WSA information flyer.
