

Petroleum Dry Cleaning industry (Subpart JJJ) were proposed on December 14, 1982 and promulgated on September 21, 1984. These standards apply to the owners or operators of petroleum dry cleaning facilities constructed, reconstructed, or modified after December 14, 1982 whose total manufacturer's rated dryer capacity is equal to or greater than 38 kilograms (84 pounds). Owners or operators of the affected facilities described must make one-time-only notifications. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Monitoring requirements and recordkeeping requirements specific to Subpart JJJ are related to the initial performance test. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NSPS. Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least 2 years following the date of such records. This information is being collected to assure compliance with 40 CFR part 60 subpart JJJ. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 6/4/99 (64 FR 107); no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 20 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of

information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners/Operators of Petroleum Dry Cleaners.

Estimated Number of Respondents: 18.

Frequency of Response: Initial.

Estimated Total Annual Hour Burden: 1,483 hours.

Estimated Total Annualized Capital, O&M Cost Burden: \$ 0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No 0997.06 and OMB Control No. 2060-0079 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Office of Policy, Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460;

and
Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503.

Dated: September 21, 1999.

Richard T. Westlund,

Acting Director, Regulatory Information Division.

Agency Information Collection Activities: Submission for OMB Review; Comment Request, New Source Performance Standards (NSPS) Synthetic Fiber Production Facilities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: New Source Performance Standards (NSPS) Subpart HHH Synthetic Fiber Production Facilities; OMB Control Number 2060-0059; expiration 10/31/99. The ICR describes the nature of the information collection

and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before October 27, 1999.

FOR FURTHER INFORMATION CONTACT:

Sandy Farmer at EPA by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download a copy of the ICR off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 1156.08.

SUPPLEMENTARY INFORMATION:

Title: NSPS Subpart HHH Synthetic Fiber Production Facilities; OMB Control Number 2060-0059; EPA ICR No. 1156.08; expiration 10/31/99. This is a request for extension of a currently approved collection.

Abstract: The New Source Performance Standards (NSPS) for synthetic fiber production facilities (Subpart HHH) were proposed on November 23, 1982 and promulgated on April 5, 1984. These standards apply to each solvent-spun synthetic fiber process that produces more than 500 megagrams of fiber per year and that commenced construction or reconstruction after November 23, 1982. The provisions of this subpart do not apply to any facility that uses the reaction spinning process to produce spandex fiber or the viscose process to produce rayon fiber, nor to facilities that commence modification but not reconstruction after November 23, 1982. VOCs are the pollutants regulated under this Subpart.

Owners or operators of the affected facilities described must make one-time-only initial notifications and report on the results of the initial performance test. Owners or operators also are required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Monitoring requirements specific to synthetic fiber production facilities provide information on VOC emissions. Owners or operators of affected facilities are required to install, calibrate, maintain, and operate a continuous monitoring system for the measurement of makeup solvent and solvent feed. These values shall be used in calculating monthly VOC emissions. Section 60.603(b)(1) provides three options for determining solvent feed.

Each owner or operator calculates VOC emissions every month from the amount of solvent feed and makeup solvent used in each affected facility. These values are used to calculate compliance with the emission

limitations on a six-month rolling average basis.

Also required are semiannual reports, and quarterly reports of instances of excess emissions. The owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements. Responses to this collection of information are mandatory and are being collected to assure compliance with 40 CFR Part 60 subpart HHH. All reports are sent to the delegated State or Local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office. These notifications, reports, and records are essential in determining compliance.

Approximately 30 sources are currently subject to the standard, and it is estimated that an additional 1 source per year will become subject to the standard in the next three years.

The required information consists of emissions data and other information that have been determined not to be private. However, any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, Chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR 2; 41 FR 36902, September 1, 1976; amended by 43 FR 40000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 17674, March 23, 1979). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on June 4, 1999 (64 FR 30011). No comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 31 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and

requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners/Operators of Synthetic Fiber Production Facilities.

Estimated Number of Respondents: 31.

Frequency of Response: Initial, quarterly, semiannual

Estimated Total Annual Hour Burden: 2,696

Estimated Total Annualized Capital, O&M Cost Burden: \$228,300

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1156.08 and OMB Control No. 2060-0059 in any correspondence. Ms. Sandy Farmer, U.S. Environmental Protection Agency, Office of Policy, Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460; and Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503.

Dated: September 21, 1999.

Public Water System Supervision Program Revision for the State of North Carolina

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Notice is hereby given that the State of North Carolina is revising its approved Public Water System Supervision Program. North Carolina has adopted drinking water regulations establishing administrative penalty authority and defining a public water system. EPA has determined that the administrative penalty authority revisions meet all minimum federal requirements, and that the public water system definition revisions are no less stringent than the corresponding federal

regulations. Therefore, EPA has tentatively decided to approve these State program revisions.

DATES: All interested parties may request a public hearing. A request for a public hearing must be submitted by October 27, 1999 to the Regional Administrator at the address shown below. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made by October 27, 1999, a public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become final and effective on October 27, 1999. Any request for a public hearing shall include the following information: (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing. (2) A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing. (3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

North Carolina Department of Environment and Natural Resources, Public Water Supply Section, Parker-Lincoln Building, 2728 Capital Boulevard, Raleigh, North Carolina 27604.

Environmental Protection Agency, Region 4, Drinking Water Section, 61 Forsyth Street, SW, Atlanta, Georgia 30303.

FOR FURTHER INFORMATION CONTACT: Dale Froneberger, EPA Region 4, Drinking Water Section at the Atlanta address given above (telephone 404-562-9446).

Authority: (Section 1401 and section 1413 of the Safe Drinking Water Act, as amended (1996), and 40 CFR part 142).

Dated: September 16, 1999.

A. Stanley Meiburg,

Acting for Regional Administrator, Region 4.
