Federal Railroad Administration

Petitions for Waivers of Compliance; Petition for Exemption for Technological Improvements

In accordance with Title 49 Code of Federal Regulations (CFR) Sections 211.9 and 211.41, and 49 U.S.C. 20306, notice is hereby given that the Federal Railroad Administration (FRA) has received a request for waiver of compliance with certain requirements of the Federal railroad safety regulations and a request for exemption of certain statutory provisions. The individual petition is described below, including the party seeking relief, the regulatory and statutory provisions involved, the nature of the relief being sought and the petitioner's arguments in favor of relief.

Utah Transit Authority

FRA Waiver Petition No. FRA-1999-6253

Utah Transit Authority (UTA) seeks a permanent waiver of compliance from certain CFR parts of Title 49, specifically: Part 219, Control of Alcohol and Drug Use; part 221, Rear End Marking Device—Passenger, Commuter and Freight Trains; part 223, Safety Gazing Standards—Locomotives, Passenger Cars and Caboose; part 225, Railroad Accidents/Incidents—Report Classification, and Investigations; part 228, Hours of Service of Railroad Employees; part 229, Railroad Locomotive Safety Standards; part 231 Railroad Safety Appliance Standards; part 234, Grade Crossing Signal System Safety; part 238, Passenger Equipment Safety Standards; part 239, Passenger Train Emergency Preparedness; part 240, Qualification and Certification of Locomotive Engineers; and the statutory requirements 49 U.S.C. 20301 through 20305.

UTA seeks approval of shared track usage and waiver of certain FRA regulations involving light rail passenger operations on the planned light rail transit system known as "TRAX." The TRAX System will operate on an approximately 15 mile track between downtown Salt Lake City and the City of Sandy, Utah to the south. FRA has jurisdiction over a portion of the TRAX System because it will be connected to the general railroad system of transportation; a portion of the TRAX System will be on a rail line on which a short line freight railroad currently operates, and will continue to operate after start-up of TRAX service.

In each section entitled "Justification," FRA merely sets out UTA's justifications which are included in its petition. In doing so, UTA references the proposed Joint Policy Statement on Shared Use of the General Railroad System issued by FRA and the Federal Transit Administration (FTA) (64 FR 28238; May 25, 1999) ("Policy Statement"). The proposed policy statement suggests that regulation of light rail service on the general rail system, under conditions of temporal separation from conventional rail movements, be handled through application of complementary strategies. FRA regulations would generally be employed to address hazards common to light rail and conventional operations for which consistent handling is necessary, while other hazards would be handled under FTA's program of State Safety Oversight (49 CFR Part 659). See proposed Policy Statement for details. Since FRA has not yet concluded its
