

source of a customer's communication problems and allowing such an exception could lead to widespread circumvention of the requirement in 18 CFR 37.6(e)(2) that all requests for transmission service be made on the OASIS, in hope of obtaining preferential treatment. It also could lead to serious abuses regarding off-line communications between transmission system operations employees, and affiliated wholesale merchant employees.

To address this concern, the Movants propose that we require an affiliated customer who submits a telephone or facsimile request because of a failure in OASIS connections to submit a sworn affidavit of a corporate officer attesting to these facts and that this affidavit should be posted on the OASIS. Southern argues, to the contrary, that Order No. 889 and the Standards of Conduct were intended to apply equally to all transmission customers and were not intended to place additional burdens on affiliate customers.

In our view, the better solution for Movants' concern is to put the burden on all transmission customers to make advance alternate arrangements, and require transmission providers to take telephone and facsimile service requests only when the OASIS node itself (instead of the customer's equipment) is inoperable. Nevertheless, this proposal prompts us to add to our clarification that, on restoration of the OASIS node's operations, OASIS personnel shall promptly (within one hour of restored operations) post on the OASIS: (1) All requests for service that were received during the outage; (2) whether those requests were accepted or denied; (3) which, if any, requests were made by an affiliate; and (4) the day/time when the OASIS service outage began and ended.⁷

The Commission orders: Movants' request for expedited clarification is granted in part, and denied in part, as discussed in the body of this order.

By the Commission.

David P. Boergers,

Secretary.

Please include the project number (2312-011) on any comments or motions filed.

k. *Description of Request:* Fort James and Great Works request Commission authorization to transfer the Project license, FERC No. 2312, to Great Works in connection with Fort James' planned sale of its hydroelectric dam and associated structures and lands on the Penobscot River. The two parties also seek authorization to amend Exhibit K to delete lands that are not necessary and appropriate to the operation and maintenance of the Great Works Dam and to identify certain facilities within and adjacent to the powerhouse that Fort James will retain that are not necessary or appropriate to the operation and maintenance of the dam but are essential to the operation of its Old Town Paper Mill.

The transfer application was filed within five years of the expiration of the license for Project No. 2312.¹ In Hydroelectric Relicensing Regulations Under the Federal Power Act, 54 FR 23,756 (June 2, 1989); FERC Statutes and Regulations, Regulations Preambles 1986-1990 ¶ 30,854 at p. 31,438 n. 318 (May 17, 1989) (Order No. 513), the Commission declined to forbid all license transfers during the last five years of an existing license, and instead indicated that it would scrutinize all such transfer requests to determine if the transfer's primary purpose was to give the transferee an advantage in relicensing, such as when a transfer is intended to escape consideration of a transferor's poor compliance record.
