9. The plan amendment process will address off highway vehicle designations in the inventory areas, consistent with the provisions of the IMP as necessary to protect wilderness characteristics.

Alternatives that are currently proposed for consideration include: (1) No Action—Under this alternative, none of the inventory areas would be designated as WSAs and the lands would continue to be managed according to the existing land use plans; (2) All areas would be designated as WSAs, and IMP would be applied to all lands; (3) Selected WSAs—Some of the 35 inventoried areas, or portions thereof, would be designated as WSAs and IMP would be applied, while other inventoried areas, or portions thereof, would not be designated as WSAs. The EIS would provide information and analysis to identify impacts associated with each alternative.

Planning for the southeastern region is expected to be completed in the Fall of 2000. A draft EIS is expected to be published by Spring of 2000.

The public will have opportunities to provide further input, review information, and to comment on the draft EIS. Anyone wanting to be added to the mail list for this planning project should contact the BLM at the address given above. Comments received, including names and addresses of respondents will be available for public review at the Utah State Office and will be subject to disclosure under the Freedom of Information Act. Individual respondents may request confidentiality. If you wish to withhold your name or street address from public review and disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written scoping letter. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses, will be made available for public inspection in their entirety.
