Regulatory Reinvention (XL) Pilot Projects

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability of Elmendorf Project XL Draft Final Project Agreement.

SUMMARY: EPA is today requesting comments on a draft Project XL Final Project Agreement (FPA) for Elmendorf Air Force Base (EAFB). The FPA is a

voluntary agreement developed collaboratively by EAFB, stakeholders, the State of Alaska, and EPA. Project XL, announced in the **Federal Register** on May 23, 1995 (60 FR 27282), gives regulated sources the flexibility to develop alternative strategies that will replace or modify specific regulatory requirements on the condition that they produce greater environmental benefits.

If implemented, the draft FPA would streamline the application, implementation, management, and renewal process for EAFB's Title V permit, through reduced monitoring and record keeping. EAFB estimates that total monitoring, record keeping, reporting, and overall management costs would decrease by about 80 percent, yielding about \$1.5 million in savings. These realized cost savings would be directed toward pollution prevention (P2) opportunities. One such P2 project involves installation of a compressed natural gas (CNG) fueling station, the purchase of new CNG vehicles, and the conversion of certain base fleet vehicles to be capable of using CNG as an alternative fuel. EAFB has assembled a list of other feasible P2 opportunities available at the base, along with the estimated costs and environmental benefits of each opportunity. EPA, the State of Alaska, and EAFB have expressed a preference for hazardous air contaminant reduction projects. A supplemental agreement setting forth the specific additional P2 opportunities to be implemented will be developed with the assistance of stakeholders.

DATES: The period for submission of comments ends on November 26, 1999.
