Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Title: Child Welfare Demonstration Project Information Collection.

OMB No.: New.

Description: Under section 1130 of the Social Security Act, the Department of Health and Human Services is given authority to approve up to ten States for Child Welfare demonstrations in each of the five fiscal years 1998-2002. These demonstration projects involve the waiver of certain requirements of titles IV-B and IV-E, the sections of the Act that govern foster care, adoption assistance, independent living, child welfare services, promoting safe and stable families, family preservation and support, and related expenses for program administration, training, and automated systems. Child Welfare demonstration projects operating this

waiver authority are required to be consistent with the purposes of existing law, cost-neutral to the Federal government, and independently evaluated. This authority provides an Opportunity for States to design and test a wide range of approaches to improve and reform child welfare. Such demonstrations should provide valuable knowledge that will lead to improvements in the delivery, effectiveness and efficiency of services.

The information collection consists of seven components, which are outlined in the Information Memorandum: (1) Application; (2) Initial Design and Implementation Report; (3) Evaluation Plan; (4) Quarterly Reports (Pre-Implementation); (5) Semi-Annual Reports (Post-Implementation); (6) Interim Evaluation Report; and (7) Final Report. The primary purpose of the demonstrations is to produce information on the outcomes for children and their families. These collections lay the information infrastructure to facilitate the dissemination of this information. If data collection is not conducted for the child welfare demonstrations, the Department relinquishes all pertinent information required to test the impact of the interventions employed in the waivers, specifically the effect of allowing the flexible use of IV-E dollars in the delivery of child welfare services. Furthermore, ensuring the safety and welfare of children is of utmost importance to CB, and if data is conducted less frequently than required by the project, interim results that could affect the well-being of children can be overlooked.

Respondents: State, Local or Tribal Governments.
