DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2487-006-New York]

John M. Skorupski; Notice of Availability of Environmental Assessment

December 1, 1999.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR Part 380 (Order No. 486, 52 F.R. 47897), the Office of Hydropower Licensing has reviewed the application for minor license for the existing Hoosick Falls Hydroelectric Project located on the Hoosic River in Rensselaer County, New York and has prepared an Environmental Assessment (EA) for the proposed project. In the EA, the Commission's staff has analyzed the potential environmental impacts of the proposed project and has concluded that approval of the proposed project, with appropriate mitigative measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch of the Commission's offices at 888 First Street, N.E., Room 2A, Washington, D.C. 20426, and may also be viewed on the web at <http://www.ferc.fed.us/online/rims.htm> (please call (202) 208-2222 for assistance).

SUPPLEMENTARY INFORMATION:

Title: New Source Performance Standard (NSPS) for Kraft Pulp Mills (OMB Control No. 2060-0021; EPA ICR No. 1055.06) expiring 01/31/00. This review is for the extension of an existing approved ICR.

Abstract: The New Source Performance Standards (NSPS) for Kraft Pulp Mills (40 CFR part 60, subpart BB) were proposed on September 24, 1976 and promulgated on February 23, 1978. These standards apply to affected facilities in kraft pulp mills. This information is being collected to assure compliance with 40 CFR part 60, subpart BB.

As is the case with all Clean Air Act information collection requests, these information requests are mandatory, according to the authorities cited in 40 CFR part 60, subpart BB. Owners or operators of the affected facilities described must make one-time-only notifications. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Monitoring requirements specific to NSPS Subpart BB provide information on the operation of the emissions control device and compliance with the total reduced sulfur (TRS) and opacity standards. Semiannual reports of excess emissions are required. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all

sources subject to NSPS. Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least 2 years following the date of such measurements, maintenance reports, and records.

The required information consists of emissions data and other information that have been determined not to be private. However, any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, Chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR part 2; 41 FR 36902, September 1, 1976; amended by 43 FR 40000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 17674, March 23, 1979).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 06/04/99; no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 58 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:
Owners/operator of Kraft Pulp Mills.

Estimated Number of Respondents:
82.

Frequency of Response: Initial, quarterly, semiannual, etc.

Estimated Total Annual Hour Burden:
9959.

Estimated Total Annualized Capital, O&M Cost Burden: \$2,827,600.

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Standard of Performance for Electric Utility Steam Generating Units

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: NSPS Subpart Da, Standards of Performance for Electric Utility Steam Generating Units, OMB No. 2060-0023, expires 1/31/2000. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before January 6, 2000.

FOR FURTHER INFORMATION CONTACT: For a copy of the ICR, call Sandy Farmer at EPA, (202) 260-2740, email at farmer.sandy@epa.gov, or download off the Internet at <http://www.epa.gov/icr/icr.htm> and refer to EPA ICR No. 1053.06.

SUPPLEMENTARY INFORMATION:

Title: NSPS-Subpart Da, Standards of Performance for Electric Utility Steam

Generating Units (OMB Control No. 2060-0023; EPA ICR No. 1053.06) expiring January 31, 2000. This is a request for extension of a currently approved collection.

Abstract: Owners or operators of electric utility steam generating units subject to NSPS subpart Da must make one-time-only notification of construction/reconstruction, anticipated and actual startup, initial performance test, physical or operational changes, and demonstration of a continuous monitoring system. They must also submit a report on initial performance test results, monitoring results, and excess emissions. Records must be maintained of startups, shutdowns, malfunctions, periods when the continuous monitoring system is inoperative, and of various fuel combustion and pollutant emission parameters.

The required notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. Performance test reports are needed as these are the Agency's records of a source's initial capability to comply with the emission standard, and serve as a record of the operating conditions under which compliance was achieved. The monitoring and excess emissions reports are used for problem identification, as a check on source operation and maintenance, and for compliance determination. The information collected from recordkeeping and reporting requirements are used for targeting inspections, and for other uses in compliance and enforcement programs.

Responses to these information collections are mandatory, per section 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined not to be private. However, any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, Chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR part 2).

Respondents/Affected Entities: Electric Utility Steam Generating Units.

Estimated Number of Respondents: 129.

Frequency of Response: Quarterly and Semiannual.

Estimated Total Annual Hour Burden: 28,606 hours.
