

related to other existing required information.

Additionally, with respect to the treatment portion of the SAPT block grant, the revised application will: replace information requested for Intravenous Drug Users that has not been required since 1995 with reporting of expenditures for HIV Early Intervention Services required of designated States; provide an appropriate format for reporting of funds authorized under P.L. 104-121, the Supplementary Security Income special authorization for fiscal years

1997 and 1998; and, add additional instructions and questions related to the States' use of data generated by the State Needs Assessment Program in the application. A new Section V will be added to accommodate voluntary reporting of treatment performance and outcome Measures. Treatment information to be collected includes: an unduplicated count of persons served with Block Grant funds; and changes in client Alcohol and Drug use, Illegal Activity, Employment Status and Homelessness.

A section is also being developed to accommodate voluntary state reporting on certain prevention performance and outcome measures. It is anticipated that this section will focus on the six prevention strategies currently specified in the block grant application and related prevention domains.

Added respondent burden is considered to be offset by reduced burden resulting from improved electronic application protocols. The annual burden estimate for the SAPT Block Grant Application Format is shown below:

Number of respondents	Responses per respondent	Hours per response	Total hours
1 <sup>1</sup> .....	1	530	530
59 .....	1	563	33,217
			33,747

<sup>1</sup> Red Lake Indian Tribe (exempt from Tobacco Regulation requirements).
