SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-XXXX.

Title: Application for a Multipoint Distribution Service or Instructional Television Fixed Service Booster Station, Response Station Hub or 125 kHz (I Channels) Point to Multipoint Transmissions.

Form Number: FCC 331.

Type of Review: New collection.

Respondents: Business or other for-profit, and not-for-profit institutions.

Number of Respondents: 4,000.

Estimated Time per Response: 32 hours (2 hours applicant, 6 hours contract attorney, 24 hours contract consulting engineer).

Frequency of Response: Reporting, on occasion.

Total Annual Burden: 8,000.

Total Annual Costs: \$19,200,000.

Needs and Uses: On September 17, 1998, the Commission adopted a Report and Order ("Two-Way Order") in MM Docket No. 97-217 in the matter of Amendment of Parts 1, 21 and 74 to Enable Multipoint Distribution Service ("MDS") and Instructional Television Fixed Service ("ITFS") Licensees to Engage in Fixed Two-Way Transmissions. These rule changes enhance the flexibility of MDS and ITFS operations through facilitated use of response stations, use of cellular configurations, use of signal booster stations with program origination capability, and use of variable bandwidth (subchanneling or superchanneling). As a result of these rule changes, MDS and ITFS frequencies

in the 2 GHz band may be used by licensees, or leased to operators, for broadband data, video or voice transmissions to and/or from subscribers' premises, promoting the competitive position of the relevant industry, augmenting the educational uses of these frequencies by ITFS entities, and increasing services to consumers. The Commission has adopted an initial one-week filing window, in which it will accept FCC Form 331 applications from MDS and ITFS licensees. Following the initial one-week filing window, the Commission will accept FCC Form 331 applications via a rolling, one-day filing window.

The Commission has developed an FCC Form 331 to be used by the licensees of MDS, Multichannel Multipoint Distribution Service (MMDS), ITFS or Commercial ITFS to apply for modification to main station, response station hub, high-power signal booster station, notification of low-power signal booster station or 125 kHz (I channel(s)) point-to-multipoint transmissions.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.
