The RDSAP will consider available information, including but not limited to, commercial and recreational catches, natural and fishing mortality estimates, recruitment, fishervdependent and fishery-independent data, and data needs. These analyses will be used to determine the condition of the stocks and the levels of acceptable biological catch (ABC). The RDSAP may also review estimates of stock size (biomass at maximum sustainable yield [Bmsy]) and minimum stock size thresholds (MSST). Currently it is illegal to harvest or possess red drum in Federal waters.

The conclusions of the RDSAP will be reviewed by the Council's Standing and Special Red Drum Scientific and Statistical Committee (SSC), and Red Drum Advisory Panel (RDAP) at meetings held between May 3–5, 2000.

A copy of the agenda can be obtained by contacting the Council (see ADDRESSES).

Although other non-emergency issues not on the agenda may come before the RDSAP for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act, those issues may not be the subject of formal action during this meeting. Actions of the RDSAP will be restricted to those issues specifically identified in the agenda and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take action to address the emergency.
