Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration will publish periodic summaries of proposed projects. Comments are invited on: (a) whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Core Measures for the Center for Substance Abuse Prevention—New

The mission of SAMHSA's Center for Substance Abuse Prevention (CSAP) is to decrease substance use and abuse and related problems among the American public by bridging the gap between research and practice. CSAP accomplishes this through field-testing scientifically defensible programs; disseminating comprehensive, culturally appropriate prevention strategies, policies, and systems; and

capacity building for states and community-based providers. Data are collected from CSAP grants and contracts where participant outcomes are assessed pre- and post-intervention. The analysis of these data help determine whether progress is being made in achieving CSAP's mission.

The primary purpose of the proposed data activity is to promote the use among CSAP grantees and contractors of measures recommended by CSAP as a result of extensive examination and recommendations, using consistent criteria, by panels of experts. The use of consistent measurement for specified

constructs across CSAP funded projects will improve CSAP's ability to respond to the Government Performance and Results Act (GPRA) and address goals and objectives outlined in the Office of National Drug Control Policy's Performance Measures of Effectiveness.

It is important to emphasize that CSAP is not requiring the use of these measures if (1) the program does not already plan to target change in the specified construct(s) and/or (2) the measure is not valid for the program's targeted population. The Core Measures are only to be used if appropriate to the program's target population and

consistent with the outcome(s) selected by the program. Consequently, no additional burden on the target population is estimated because the program is not being asked to collect data above and beyond what would already have been planned. The annual burden estimated is that for the grantees to extract the necessary data from their files and provide it to CSAP's data coordinating center. The table below summarizes the maximum estimated time, i.e., if all programs used all of the Core Measures—which is unlikely.

Program	No. of grantees	Responses per grantee	Hours per response	Total annual burden
Knowledge Development:				
Children of Substance Abusing Parents	14	1	3	42
Community Initiated	21	1	3	63
Family Strengthening	97	1	3	291
Parenting Adolescents and Welfare Reform	10	1	3	30
High Risk Youth/Youth Connect	18	1	3	54
Targeted Capacity Enhancement:				
HIV/Targeted Capacity	48	1	3	144
State Incentive Grants	21	1	3	63
Total	229	687
