POLICY JUSTIFICATION

Saudi Arabia - Continued Modernization of the Saudi Arabian National Guard

The Government of Saudi Arabia has requested a possible sale of communication equipment for the continuation of the U.S. supported effort to modernize Saudi Arabian National Guard (SANG) to include 520 AN/VRC-90, 300 AN/VRC-92 and 300 AN/PRC-199 advanced tactical communication systems, 50 very high frequency RT-1702E receiver transmitter modules, radio, installation kits, spare and repair parts, publications and technical documentation, personnel training, contractor engineering and technical assistance, and other related elements of logistics support. The estimated cost is \$65 million.

The proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in the Middle East.

The proposed sale will provide the SANG with the modern command control communications needed to provide security throughout the region. It is consistent with the National Command Authority's intent for stability in the CENTCOM Area of Operation. The radios will modernize equipment and provide the critical VHF and HF links necessary for a large fast moving force and integration with the SINCGAR radios SANG already has fielded in their Light Armored Vehicle and Light Infantry Brigades. The RT-170E receiver transmitter modules will be utilized as direct exchange components to maintain fleet operational readiness.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be of ITT, Fort Wayne, Indiana and Harris Corporation, Rochester, New York. There are no offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any U.S. Government representative, however; four contractor representatives will be required for two years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
