**Title:** Diversions, Return Flow, and Consumptive Use of Colorado River Water in the Lower Colorado River Basin.

**OMB No.:** 1006-0015.

**Abstract:** Reclamation delivers Colorado River water to water users for diversion and beneficial consumptive use in the States of Arizona, California, and Nevada. Under Supreme Court order, the United States is required, at least annually, to prepare and maintain complete, detailed, and accurate records of diversions of water, return flow, and consumptive use. This information is needed to ensure that a State or a water user within a State does not exceed its authorized use of Colorado River water. Water users are obligated to provide information on diversions and return flows to Reclamation by provisions in their water delivery contracts. Reclamation determines the consumptive use by subtracting return flow from diversions or by other engineering means. Without the information collected, Reclamation could not comply with the order of the United States Supreme Court to prepare and maintain detailed and accurate records of diversions, return flow, and consumptive use.

**Description of respondents:** The Lower Basin States (Arizona, California, and Nevada), local and tribal entities, water districts, and individuals that use Colorado River water.

**Frequency:** Annually, or otherwise as determined by the Secretary of the Interior.

**Estimated completion time:** An average of 6 hours per respondent.

**Annual responses:** 54 respondents.

**Annual burden hours:** 324.

Dated: February 7, 2000.

#### Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA-W) issued during the period of January and February, 2000.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

#### Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

**DEPARTMENT OF LABOR****Employment and Training Administration**

[TA-W-35,970]

**Glenoit Corporation, Jacksboro, Tennessee; Notice of Negative Determination on Reconsideration**

On November 15, 1999, the Department issued an Affirmative Determination Regarding Application for Reconsideration applicable to workers of the subject firm. The Union of Needletrades, Industrial and Textile Employees, AFL-CIO, CLC, (UNITE) presented evidence that the Department's survey of the subject firm's customers was incomplete. The notice was published in the **Federal Register** on November 23, 1999 (64 FR 65728).

The Department initially denied TAA to workers producing fleece fabric at Glenoit Corporation located in Jacksboro, Tennessee, based on the finding that the "contributed importantly" test of the worker group eligibility requirements of Section 222 of the Trade Act of 1974, as amended, was not met. The investigation revealed that the customers responding to a customer survey reported no increase in import purchases of fleece fabric during the relevant time period of the investigation (1997 to 1998 and the first half of 1999 compared to first half of 1998).

At the Department's request, the subject firm identified additional declining customers. On reconsideration, the Department conducted further survey of the subject firm's major declining customers. One respondent reported replacing purchases of fleece fabric from Glenoit with imports. This customer, however, accounted for an insignificant percentage of the subject firm's sales decline. Other respondents to the survey reported no import purchases of fleece fabric like or directly competitive with that produced by the workers of the firm.

**Conclusion**

After reconsideration, I affirm the original notice of negative determination of eligibility to apply for worker adjustment assistance for workers and former workers of Glenoit Corporation, Jacksboro, Tennessee.
