Background Information

Development of the Draft Plan Amendments and the EIS began with scoping meetings held in conjunction with the National Park Service which is conducting concurrent planning efforts on adjacent lands. The Northern and Eastern Mojave Planning Area covers 3.3 million acres of land in the southeastern California Desert of which 2.4 million acres are public lands. This document describes and analyzes a number of alternatives for managing species and habitats on public lands administered by the BLM. Issues identified during public scoping included (1) recovery of threatened and endangered species, including the

desert tortoise, the Amargosa vole, the Amargosa niterwort, the Ash Meadows Gumplant and spring-loving Centaury (threatened); (2) maintenance of public access through the NEMO planning area which includes sensitive areas, is surrounded by two national park units and two large military bases, and includes all or parts of twenty-four wilderness and eight wilderness study areas; (3) addressing impacts to other land uses; and (4) protection of County tax base.
