SUPPLEMENTARY INFORMATION:

I. Abstract

NOAA operates meteorological satellite imagery transmission systems whose data are available worldwide. Any user can establish a ground station for receiving the data without prior consent from NOAA. Surveying of customers allows NOAA to learn about who uses the data, how, with what equipment, the location of the equipment, and similar subjects. This information is used to help determine the possible impact of signal or data changes, to identify users for future contacts, and to annually report to the World Meteorological Organization on the geographic location and capabilities of known receiving stations.

II. Method of Collection

People contacting NOAA in a way that indicates that they may operate a satellite receiving station for acquiring NOAA data are mailed a questionnaire. An electronic version is available to persons accessing the related NOAA Web site.
