Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested and the petitioner's arguments in favor of relief.

United States Department of the Interior

[Docket Number FRA-2001-9012]

The United States Department of the Interior on behalf of Steam Town National Historic Site seeks a waiver of compliance with the Inspection and Maintenance Standards for Steam Locomotives, 49 CFR Part 230, published November 17, 1999. Section 230.3(c) of the standards requires steam locomotives having flue tubes replaced prior to September 25, 1995, have a one thousand four hundred seventy-two service day inspection [49 CFR 230.17] performed prior to being allowed to operate under the requirements. The Steam Town National Historic Site seeks this waiver for one locomotive number CP 2317, which had the flue tubes replaced and was returned to service in July of 1998. Steam Town National Historic Site was unaware of the requirement to file for special consideration and failed to meet the cut off filing date of January 18, 2001.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before

the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number FRA-2001-9012) and must be submitted in triplicate to the Docket Clerk, DOT Central Docket Management Facility, Room P1-401, Washington, DC 20590-0001. Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.-5 p.m.) at DOT Central Docket Management Facility, Room P1-401 (Plaza Level), 400 Seventh Street SW., Washington, DC. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's Web site at <http://dms.dot.gov>.

Issued in Washington, DC, on April 23, 2001.

Long Island Rail Road

[Docket Number FRA-2000-8588]

Long Island Rail Road (LIRR) seeks a waiver of compliance with the Safety Appliance Safety Standards, 49 CFR part 231.14, which requires that sill steps be mounted utilizing mechanical fasteners. They request that the waiver be granted for one hundred twenty-one bi-level passenger coaches and twenty-three bi-level control car locomotives manufactured by Kawasaki. The waiver, if granted, would allow sill steps located at the four corners and two located on each side of the equipment, at the side

door locations, to be mechanical fastened to a bracket that is welded to a tubular side sill. The railroad states that the equipment is a center sill-less design and is supported by two tubular side sills and to mechanically fasten the step to the car would require drilling the sill which would weaken it.
