

SUPPLEMENTARY INFORMATION: The Agricultural Policy Advisory Committee for Trade (APAC) and the Agricultural Technical Advisory Committees for Trade (ATACs) are authorized by sections 135(c)(1) and (2) of the Trade Act of 1974, as amended (Pub. L. No. 93-618, 19 U.S.C. 2155). The purpose of the committees is to provide advice to the Secretary and the U.S. Trade Representative concerning agricultural trade policy and are intended to ensure that representative elements of the private sector have an opportunity to make known their views to the U.S. Government.

Rechartering

Pursuant to the Federal Advisory Committee Act (5 U.S.C. Appendix), the Foreign Agricultural Service gives notice that the Secretary of Agriculture and the U.S. Trade Representative have reestablished the Agricultural Policy Advisory Committee for Trade (APAC) and the Agricultural Technical Advisory Committees for Trade (ATACs). In 1974, Congress established a private sector advisory committee system to ensure that U.S. trade policy and negotiation objectives adequately reflect U.S. commercial and economic interests. The private sector advisory system now consists of almost 40 committees, arranged in three tiers:

- The President's Advisory Committee on Trade and Policy Negotiations (ACTPN);
- Seven advisory committees, including the APAC, and;
- Over 30 technical advisory committees, including the ATACs. The renewal of such committees is in the public interest in connection with the duties of the U.S. Department of Agriculture (USDA) imposed by the Trade Act of 1974, as amended.

General Committee Information

All APAC and ATAC committee members are appointed by the Secretary of Agriculture and the U.S. Trade Representative (USTR), and serve at the directions of the Secretary and the USTR. To serve and attend committee meetings, members must be U.S. citizens, and have successfully completed a confidential security clearance. Committee members serve without compensation; they are not reimbursed for their travel expense.

Committee meetings will be open to the public, unless the U.S. Trade Representative determines that the committees will be discussing issues the disclosure of which justify closing a meeting or portions of the meeting, in accordance with 5 U.S.C. 552(c).

All committee appointments expire on May 1, 2003; by the Secretary and USTR may renew an appointment for one or more additional terms.

Each committee has a chairperson, who is elected from the membership of that committee. In addition to their individual responsibilities, all communities are required to meet at the conclusion of negotiations for each trade agreement, and to provide a report on each agreement to the President, Congress, and to the U.S. Trade Representative.

[All meetings will be held in Washington, D.C.]

Agricultural Policy Advisory Committee for Trade (APAC)

The APAC has approximately 50 members, and is composed of a broad spectrum of agricultural interests. It provides advice concerning:

- Negotiating objectives and bargaining positions before the United States enters into a trade agreement;
- The operation of various U.S. trade agreements; and
- Other matters arising from the administration of U.S. trade policy.

Agricultural Technical Advisory Committees for Trade (ATACs)

The ATACs provide advice and information regarding trade issues which affect both domestic and foreign production in the commodities, drawing upon the technical competence and experience of its members. There are five ATACs, one for each of the following sectors:

- Grains, Feed, and Oilseeds;
- Animals and Animal Products;
- Fruits and Vegetables;
- Sweeteners and Sweetener Products; and
- Tobacco, Cotton, and Peanuts.

Each ATAC has approximately 25 members, for a total of approximately 125 members.

Nominations and Selection of Members

Nominations are open to all individuals without regard to race, color, religion, sex, national origin, age, mental or physical handicap, marital status or sexual orientation. To ensure that the recommendations of the committees take into account the needs of the diverse groups served by the Department, membership shall include, to the extent practicable, individuals with demonstrated ability to represent minorities, women, and persons with disabilities.

Members are selected primarily for their expertise and knowledge of agriculture trade as it relates to policy and commodity specific products. No

person, company, producer, farm organization, trade association, or other entity has a right to representation on a committee. All members serve at the discretion of the Secretary of Agriculture and the U.S. Trade Representative. In making selections, every effort will be made to maintain balanced representation on the committees: representation from producers, farm and commodity organizations, processors, traders, consumers, as well as geographical balance.

Issued at Washington, D.C. this 1st day of May, 2001.

Dated: May 1, 2001.

Paul W. Fiddick,

Assistant Secretary for Administration.

DEPARTMENT OF COMMERCE

Submission For OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: 2002 Economic Census Covering The Wholesale Trade Sector.

Form Number(s): Too numerous to list here.

Agency Approval Number: none.

Type of Request: New collection.

Burden: 720,000 hours in FY 2003.

Number of Respondents: 480,000.

Avg Hours Per Response: 1.5 hours.

Needs and Uses: The U.S. Census Bureau requests Office of Management and Budget approval of the information collection forms it will use in conducting the 2002 Economic Census covering the Wholesale Trade Sector. The wholesale trade sector comprises establishments primarily engaged in the selling or arranging the purchase or sale of durable nonconsumer goods, selling goods for resale, and the sale of other

goods from establishments that operate from a warehouse or office and do not normally advertise directly to the general public. The census will use a mail canvass, supplemented by data from Federal administrative records, to measure the economic activity of more than 480,000 wholesale establishments classified in the North American Industry Classification System (NAICS).

The economic census will produce basic statistics by kind of business on number of establishments, sales, payroll, employment, inventories, and operating expenses. It also will yield a variety of subject statistics, including sales by commodity line; e-commerce sales; sales by class of customer; employment by principal activity; measures of gross margin and gross profit; and other industry-specific measures, such as bulk storage capacity by type of facility for petroleum bulk stations and terminals. Basic statistics will be summarized for the United States, states, and metropolitan areas, and counties and places having 2,500 inhabitants or more. Tabulations of subject statistics also will present data for the United States and, in some cases, for states and metropolitan areas.

The economic census is the primary source of facts about the structure and functioning of the Nation's economy and features unique industry and geographic detail. Economic census statistics serve as part of the framework for the national accounts and provide essential information for government, business, and the general public. The Federal Government uses information from the economic census as an important part of the framework for the national income and product accounts, input-output tables, economic indexes, and other composite measures that serve as the factual basis for economic policy-making, planning, and program administration. Further, the census provides sampling frames and benchmarks for current surveys of business which track short-term economic trends, serve as economic indicators, and contribute critical source data for current estimates of gross domestic product. State and local governments rely on the economic census as a unique source of comprehensive economic statistics for small geographic areas for use in policy-making, planning, and program administration. Finally, industry, business, academe, and the general public use information from the economic census for evaluating markets, preparing business plans, making business decisions, developing economic models and forecasts, conducting economic research, and
