#### Permits and Modified Permits Issued

##### Permit #1298

Notice was published on March 5, 2001 (66 FR 13305), that Ms. Melissa Salmon, of Riverbanks Zoological Park applied for an enhancement permit (1298). The applicant has requested a 5-year permit to continue to maintain eleven adult shortnose sturgeon received from the South Carolina Department of Natural Resources in 1996 for education purposes. NMFS believes that captive maintenance of endangered shortnose sturgeon for enhancement purposes is to the benefit of the species as a whole. The source for the captive display are shortnose sturgeon maintained in hatchery settings that have been deemed non-releasable by NMFS. Because these cultured sturgeon have been deemed non-releasable at this time by NMFS, alternatives to sacrifice were needed. The recovery team for shortnose sturgeon felt that these cultured fish provided an excellent opportunity to educate the public and increase awareness of the species and its plight. These fish are used in research activities and, as recommended by the recovery team, in enhancement activities such as public education. Permit 1298 was issued on May 4, 2001, authorizing take of listed species. Permit 1298 expires May 31, 2006.

##### Permit #1266

Notice was published on October 19, 2000 (65 FR 62709), that John Glass, of REMSA, Inc. applied for a research/enhancement permit (1266). The applicant requested a 5-year permit to take leatherback, green, loggerhead, Kemp's ridley and green turtles from the Atlantic Ocean and Gulf of Mexico in conjunction with US Army Corps of Engineer Dredging projects for scientific research and enhancement purposes. Permit 1266 was issued on May 8, 2001, authorizing take of listed species. Permit 1266 expires April 30, 2006.

Dated: May 15, 2001.

##### Marine Mammals; Scientific Research and Enhancement Permit (PHF# 116-1477)

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Receipt of application for amendment.

**SUMMARY:** Notice is hereby given that SeaWorld of Texas, 10500 Sea World Drive, San Antonio, Texas, 78251, has applied in due form for an amendment to Permit No. 116-1477 to take Hawaiian monk seals (*Monachus schauinslandi*) for purposes of scientific research.

**DATES:** Written comments must be received on or before June 20, 2001.

**ADDRESSES:** The application and related documents are available for review upon written request or by appointment in the following office(s): (see **SUPPLEMENTARY INFORMATION**).

Written comments or requests for a public hearing on this request, should be submitted to the Chief, Permits and Documentation Division, F/PR1, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular amendment request would be appropriate.

Comments may also be submitted by facsimile at (301)713-0376, provided the facsimile is confirmed by hard copy submitted by mail and postmarked no later than the closing date of the comment period. Please note that comments will not be accepted by e-mail or by other electronic media.

**FOR FURTHER INFORMATION CONTACT:** Amy Sloan or Ruth Johnson, (301)713-2289.

**SUPPLEMENTARY INFORMATION:** The subject permit amendment is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and

Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered fish and wildlife (50 CFR part 222.23).

Permit No. 116-1477 authorizes the permit holder to permanently transfer ten (10) captive, unreleasable female Hawaiian monk seals from the National Marine Fisheries Service's Kewalo Research Facility to SeaWorld of Texas for research and enhancement purposes. The primary objective of the Permit is to make the seals available for scientific research on an opportunistic basis in order to benefit the wild population of Hawaiian monk seals. As provided for in the Permit, the permit holder requests authorization to conduct research studies on the ten captive female Hawaiian monk seals now permanently held at SeaWorld of Texas. The research study involves systematic feeding of certain prey to the captive seals and subsequent comparison of fatty acid composition of blubber samples with the fatty acid composition of the food consumed. The goal is to determine whether the assessment of fatty acid signatures in blubber samples of free-ranging Hawaiian monk seals may be an appropriate and reliable method for qualitative and quantitative assessment of their diet. This study is aimed at reducing or eliminating adverse interactions between current and anticipated fishing operations with free-ranging Hawaiian monk seals.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this amendment application to the Marine Mammal Commission and its Committee of Scientific Advisors. The application and related documents are available for review in the following office(s):
