annual audit.⁷ Thus, the IDSMs currently operating under the Rule would have a total estimated burden of about 9,235 hours $(36,936 \times 15 \text{ min. } 60 \text{ min./hr.})$.

Total annual labor cost: \$461,725. Assuming that IDSMs use skilled clerical or technical support staff to compile and maintain the records required by the Rule at an hourly rate of \$15, the labor cost associated with the 24,625 recordkeeping burden hours would be \$369,375. If IDSMs use clerical support at an hourly rate of \$10 to reproduce records, the labor costs of the 9,235 disclosure burden hours is approximately \$92,350. The combined total labor cost for recordkeeping and disclosures is \$461,725.

Total annual capital or other nonlabor costs: \$300,000.

Total capital and start-up costs: The Rule imposes no appreciable current capital or start-up costs. The vast majority of warrantors have already developed systems to retain the records and provide the disclosures required by the Rule. Rule compliance does not require the use of any capital goods, other than ordinary office equipment, to which providers would already have access.

The only additional cost imposed on IDSMs operating under the Rule that would not be incurred for other IDSMs is the annual audit requirement. One of the IDSMs currently operating under the Rule estimates the total annual costs of this requirement to be under \$100,000. Since there are three IDSMs operating under the Rule (Toyota and Chrysler share the same IDSM, though each company is reported separately), staff estimates the total non-labor costs associated with the Rule to be three times that amount, or \$300,000.8 This extrapolated total, however, also reflects an estimated \$120,000 for copying costs, which is accounted for separately under the category below. Thus, estimated costs attribute solely to capital or startup expenditures is \$180,000.

Other non-labor costs: \$120,000 in copying costs. This total is based on estimated copying costs of 5 cents per page and several conservative assumptions or estimates. Staff estimates that the "average" disputerelated file is about 25 pages long and

that a typical annual audit file is about 200 pages in length. For purposes of estimating copying costs, staff assumes that every consumer complainant (or approximately 36,938 consumers) requests a copy of the file relating to his or her dispute. Staff also assumes that, for about 7,388 (20%) of the estimated 36,938 disputes each year, consumers request copies of warrantors' annual audit reports (although, based on requests for audit reports made directly to the FTC, the indications are that considerably fewer requests are actually made). Thus, the estimated total annual copying costs for avarage-sized files would be approximately \$46,173 (25 pages/file ×.05×36,938 requests) and \$73,880 for copies of annual audits (200 pages/audit report×.05×7,388 requests), for total copying costs of \$120,053, rounded to \$120,000).

John D. Graubert,

Acting General Counsel.

GENERAL SERVICES ADMINISTRATION

Office of Communications; Cancellation of an Optional Form by the Department of Defense

AGENCY: General Services Administration. **ACTION:** Notice.

SUMMARY: The Department of Defense canceled the following Optional Form because of low usage: OF 80, 999 (Label) (Small)

DATES: Effective May 31, 2001.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara Williams, General Services Administration, (202) 501–0581.

Dated: April 6, 2001.

Barbara M. Williams.

Deputy Standard and Optional Forms Management Officer, General Services Administration.

[FR Doc. 01–13686 Filed 5–30–01; 8:45 am] **BILLING CODE 6820–34-M**

GENERAL SERVICES ADMINISTRATION

Public Buildings Service; Availability of Draft Environmental Impact Statement: United States Mission to the United Nations

Pursuant to Section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended, as implemented by the Council on Environmental Quality (40 CFR parts 1500–1508), the General Services Administration (GSA) has filed with the U.S. Environmental Protection Agency and made available to other government agencies and interested private parties, the Draft Environmental Impact Statement (DEIS) for the demolition of the Federal building currently housing the United States Mission to the United Nations (USUN) and the subsequent construction of a new facility on the same site.

The DEIS is on file at GSA offices in Manhattan. Copies of the DEIS Executive Summary or additional information may be obtained from: General Services Administration, Public Buildings Service—2PT, 26 Federal Plaza, Room 1609, New York, New York, 10278, ATTN: Peter Sneed.

Written comments regarding the DEIS may be submitted until Friday July 13th, 2001 and should be addressed to General Services Administration in care of the above noted individual. A public hearing is scheduled for Wednesday June 13th, 2001, at the New York University Medical College Classroom A, 550 First Avenue (between 31st and 32nd Streets), New York, New York at 7 PM.

Dated: May 14, 2001.

Steve Ruggiero,

Acting Regional Administrator (2A). [FR Doc. 01–13587 Filed 5–30–01; 8:45 am] BILLING CODE 6820–23–M

Centers for Disease Control and Prevention

[60-Day-01-45]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639–7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have

⁷This estimate incorporates any additional time needed to reproduce copies of audit reports for consumers upon their request. Inasmuch as consumers request such copies in only a minority of cases, this estimate is likely an overstatement.

⁸ The industry source did not break down this estimate by cost item. Staff conservatively included the entire \$100,000 in its estimate of capital and other non-labor costs, even though some of this burden is likely already accounted for as labor costs.

practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Anne O'Connor, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project: 2002 National Health Interview Survey Basic Module—Revision—OMB. No. 0920– 0214, National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC). The annual National Health Interview Survey (NHIS) is a basic source of general statistics on the health of the U.S. population. In accordance with the

1995 initiative to increase the integration of surveys within the Department of Health and Human Services, respondents to the NHIS serve as the sampling frame for the Medical Expenditure Panel Survey. This survey is conducted by the Agency for Healthcare Research and Quality. The NHIS has long been used by government, university, and private researchers to evaluate both general health and specific issues, such as cancer, AIDS, and childhood immunizations. Journalists use its data to inform the general public. It will continue to be a leading source of data for the Congressionally-mandated "Health US" and related publications, as well as the single most important source of statistics to track progress toward the National Health Promotion and Disease Prevention Objectives, "Healthy People 2010."

Because of survey integration and changes in the health and health care of the U.S. population, demands on the

NHIS have changed and increased, leading to a major redesign of the annual core questionnaire, or Basic Module, and a redesign of the data collection system from paper questionnaires to computer assisted personal interviews (CAPI). Those redesigned elements were partially implemented in 1996 and fully implemented in 1997. This clearance is for the sixth full year of data collection using the Basic Module on CAPI and for the implementation of Topical Modules (or supplements) on asthma, hearing, vision, disability, environmental health, arthritis, and alternative medicine. The supplements will help track many of the Health People 2010 objectives. This data collection, planned for January-December 2002, will result in publication of new national estimates of health statistics, release of public use micro data files, and a sampling frame for other integrated surveys. There is no cost to the respondents other than their

Respondents	Number of respondents	Number of responses/ Respondent	Avg. burden/ response (in hours)	Total burden (in hours)
Family	42,000 42,000 18,000	1 1 1	0.35 0.70 0.25	14,700 29,400 4,500
Total				48,600

Dated: May 22, 2001.

Nancy Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and

instruments, call the CDC Reports Clearance Officer on (404) 639–7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project: Willingness to Pay Project—NEW—Epidemiology Program Office (EPO), Centers for Disease Control and Prevention (CDC). The mission of the Prevention Effectiveness Branch is to provide information and training to build internal and external capacity in economic and decision sciences.

This project will use qualitative and quantitative research to develop and test informational approaches (educational materials or product labeling) to educate consumers about food safety issues, develop and test survey instruments and test experimental protocols to be used in the main quantitative data collection; provide a nationally-representative estimate of consumer willingness to pay for (a) publicly-provided reductions in the probability of contracting foodborne illnesses; (b) reductions in severity of symptoms associated with foodborne illnesses, and (c) materials that facilitate private, defensive precautions against foodborne illness during home food preparation (e.g., meat thermometers, antibacterial soaps and cutting boards). Estimate the effect of education programs and product labeling on willingness to pay for the reductions; compare the empirical estimates of the above mentioned consumer willingness to pay derived from a conjoint analysis instrument and a simulated marketplace experiment.

Public awareness and stated concern regarding foodborne illnesses have
