Background

As stated in the 1997 Agency Strategic Plan, one of the SSA's five major goals is "To Strengthen Public Understanding of the Social Security Programs" so the public will understand what benefits are valuable to them personally. Accordingly, the public will be able to more effectively plan for retirement security. Under this goal, SSA established a strategic objective that, by 2005, 90% of the public will be knowledgeable about SSA programs. In establishing this goal SSA recognized the need to develop innovative methods to help educate and continually measure the public's knowledge of SSA programs.

The Collection—"Quiz Show"

SSA intends to implement an online interactive educational game entitled "Quiz Show—Internet Edition". The purpose of Quiz Show is to help support the Agency's goal of increasing the public's understanding of Social Security programs.

Quiz Show will consist of 10 questions, which are based on 8 key messages about SSA programs that the Agency wants the public to understand. Participation in the online game will be strictly voluntary. Data collected through each Quiz Show question will measure the overall responses for the purpose of gauging the public's knowledge of each key Social Security message.

SSA will implement Quiz Show in stages, with the initial stage providing performance feedback to the user. However, eventually SSA will use Quiz Show to collect performance data and

demographic data. SSA will not require users to provide demographic data to play the game. Rather, users would be asked to provide this data voluntarily. Questions related to demographics are for the sole purpose of identifying audiences to whom specific key messages should be targeted to increase their knowledge. Respondents to Quiz Show will be individuals who visit SSA's website, Social Security Online, and elect to play the online game.
