

renovations at these sites as required by the Act and implementing regulations in 34 CFR 395.31(c). Furthermore, during the renovations at the Birmingham and Tuscaloosa Medical Centers, DVA/VCS failed to provide the SLA with access to the facilities, personnel numbers, or financial data pertaining to the vending operations, as required by the Act, to determine if a suitable site existed.

Therefore, for the previously stated reasons, the arbitration panel ruled that DVA/VCS had violated the Randolph-Sheppard Act. However, the panel stated that it did not have the authority to prescribe remedies. It noted that DVA/VCS' current position is that it is presently in compliance with the Randolph-Sheppard Act.

The views and opinions expressed by the panel do not necessarily represent the views and opinions of the U.S. Department of Education.

Dated: June 12, 2001.

Francis V. Corrigan,

Deputy Director, National Institute on Disability and Rehabilitation Research.

BILLING CODE 4000-01-U

DEPARTMENT OF ENERGY

National Energy Technology Laboratory; "Identification and Demonstration of Preferred Upstream Management Practices II (Pump II) for the Oil Industry"

AGENCY: National Energy Technology Laboratory (NETL), Department of Energy (DOE).

ACTION: Notice of availability of a financial assistance solicitation.

SUMMARY: Notice is hereby given of the intent to issue Financial Assistance Solicitation No. DE-PS26-01BC15300 entitled "Identification and Demonstration of Preferred Upstream Management Practices II (PUMP II) for the Oil Industry." The Department of Energy (DOE) National Energy Technology Laboratory (NETL), on behalf of its National Petroleum Technology Office (NPTO), seeks cost-shared research and development applications for identification of preferred management practices (PMP) and technology solutions addressing a production barrier in a region and the documentation of these practices for use by the oil industry. Applications will address either the development of public play portfolios addressing a region where the application of preferred geologic and engineering practices will identify significant exploration and development reserves

or demonstrations of new methods/protocols for data sharing among operators, organizations and agencies to improve the processing of information necessary for approving and managing the operations of the industry. As in the PUMP I solicitation in 2000, the near-term goal is to advance technology capabilities and to increase current domestic oil production quickly.

An Information Package is available on the NETL's Homepage at <http://www.netl.doe.gov/business> for viewing and downloading. The Information Package contains general information regarding the proposed solicitation.

DATES: The solicitation will be available on the DOE/NETL's Internet address at <http://www.netl.doe.gov/business> on or about June 12, 2001.

FOR FURTHER INFORMATION CONTACT:

Keith R. Miles, U.S. Department of Energy, National Energy Technology Laboratory, P.O. Box 10940, MS 921-166, Pittsburgh, PA 15236-0940, E-mail Address: miles@netl.doe.gov, Telephone Number: 412/386-5984.

SUPPLEMENTARY INFORMATION: The National Petroleum Technology Office of the Department of Energy (DOE) Office of Fossil Energy (FE) National Energy Technology Lab (NETL) is soliciting cost-shared applications for identification of preferred management practices (PMP) and technology solutions addressing information-related barriers and data-sharing solutions to a production barrier in a region and the documentation of these practices for use by the industry. The near-term goal is to increase current domestic oil production quickly.

The mission of the Department of Energy's Fossil Energy Oil Program is driven by the needs of the oil producers. The overall program is designed to develop unique technologies and processes to locate untapped resources; to extend the life of domestic energy resources; and to reduce well abandonment-all essential to maximizing the production of domestic resources while protecting our environment. The National Petroleum Technology Office's Preferred Upstream Management Practices (PUMP) program as a part of this overall goal is designed to facilitate production of existing oil reserves more quickly without sacrificing efficiency or environmental protection.

Based on prior successful results from demonstrations of under-utilized or advanced technology coupled with reservoir characterization, the DOE Oil Program seeks to demonstrate that the identification and use of PMP can

overcome regional constraints to increased production.

The program will accept proposals that combine the identification of public play portfolios using preferred advanced geologic and engineering practices and technology to overcome regional production constraints and aggressive technology transfer that will promote the use of those practices. In addition, the program will accept proposals that demonstrate preferred management practices and technology to encourage data-sharing in the industry and government regulating oil and gas production. Barriers can be identified as technical, physical, regulatory, environmental, or economic. The selected projects are expected to employ the following four (4) strategies in order to have a rapid impact on production: (1) Focus on regions that present the biggest potential for additional oil production quickly, (2) integrate solutions to technological, economic, regulatory, and data constraints, (3) demonstrate the validity of these practices either through field demonstration during the project or documentation of well-run successful past demonstration, and (4) use known technology transfer mechanisms.

Using a regional approach where the projects will have a wide applicability, an integrated approach scheduling tasks along parallel paths to facilitate a quicker response, and operating with existing networks, the production results in the field should be accelerated. The documentation and evaluation of the PMP will be a valuable resource to all producers in the applicable area and possibly other regions as well.

This program expects near-term results and actions that will create data or technological resources suitable for long-term use. Teaming is encouraged and the proposal partners could include, but not be limited to, producers, producer organizations, universities, service companies, State agencies or organizations, non-Federal research laboratories, and Native American Tribes or Corporations. They will demonstrate practices and/or technologies that can increase production, increase cost savings, or rapid returns on the capital investments of the operators. New technologies/processes or under-used but effective applications of existing technologies/processes critical to a region will be demonstrated. The DOE will make publicly available over the Internet the data on preferred practices resulting from this program. The resulting publicly available databases of the preferred practices will be interactive,

Internet accessible, should include both technologies and practices, and address constraints in the exploration, production, or environmental areas.

DOE anticipates issuing financial assistance (Cooperative Agreement) awards. DOE reserves the right to support or not support, with or without discussions, any or all applications received in whole or in part, and to determine how may awards will be made. Multiple awards are anticipated. Approximately \$3.9 million of DOE funding is planned over a 2 year period for this solicitation. The program seeks to sponsor projects for a single budget/project period of 24 months or less. Due to the low risk and near-term nature of the PUMP program and the potential for a process or technology demonstration, all applicants are required to cost share at a minimum of 50% of the project total. Details of the cost sharing requirement, and the specific funding levels are contained in the solicitation.

Prospective applicants who would like to be notified as soon as the solicitation is available should register at <http://www.netl.doe.gov/business>. Provide your E-mail address and click on the "Oil & Gas" technology choice located under the heading "Fossil Energy." Once you subscribe, you will receive an announcement by E-mail that the solicitation has been released to the public. Telephone requests, written requests, E-mail requests, or facsimile requests for a copy of the solicitation package will not be accepted and/or honored. Applications must be prepared and submitted in accordance with the instructions and forms contained in the solicitation. The actual solicitation document will allow for requests for explanation and/or interpretation.

Issued in Pittsburgh, PA, on June 5, 2001.

Dale A. Siciliano,

Deputy Director, Acquisition and Assistance Division.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EC01-111-000, et al.]

Southwestern Public Service Company, et al., Electric Rate and Corporate Regulation Filings

June 8, 2001.

Take notice that the following filings have been made with the Commission:

1. Southwestern Public Service Company

[Docket No. EC01-111-000]

Take notice that on May 30, 2001, Southwestern Public Service Company, a wholly-owned utility operating company subsidiary of Xcel Energy Inc., filed with the Federal Energy Regulatory Commission (Commission) an application pursuant to Section 203 of the Federal Power Act for authorization to transfer operational control of jurisdictional transmission facilities to the Southwest Power Pool Regional Transmission Operator.

Comment date: June 20, 2001, in accordance with Standard Paragraph E at the end of this notice.

2. Cleco Power LLC

[Docket No. EC01-113-000]

Take notice that on June 1, 2001, Cleco Power LLC (Cleco) filed an application pursuant to Section 203 of the Federal Power Act, 16 U.S.C. 824b and Part 33 of the Commission's regulations, 18 CFR Part 33. Cleco requests authorization to transfer operational control over certain of its transmission facilities to the proposed Southwest Power Pool Regional Transmission Organization (SPP RTO) and provides a list of agreements that it proposes to be grandfathered from the application of the SPP RTO tariff.

Comment date: June 22, 2001, in accordance with Standard Paragraph E at the end of this notice.

3. Curtis/Palmer Hydroelectric Company, L.P. and TransCanada (Curtis/Palmer) Ltd., TransCanada (Hydroelectric) USA Ltd.

[Docket No. EC01-112-000]

Take notice that on May 31, 2001, Curtis/Palmer Hydroelectric Company, L.P. (Curtis/Palmer), TransCanada (Curtis/Palmer) Ltd., and TransCanada (Hydroelectric) USA Ltd. filed with the Federal Energy Regulatory Commission an application pursuant to Section 203 of the Federal Power Act for authorization of the transfer of International Paper Company's 100% partnership interests (held in equal parts by wholly-owned subsidiaries, Saratoga Development Corporation and IP-Hydro L.L.C.) in the Curtis/Palmer Hydroelectric Company, L.P. to TransCanada (Curtis/Palmer) Ltd. and TransCanada (Hydroelectric) USA Ltd. (TransCanada Subsidiaries). The TransCanada Subsidiaries will pay cash for the partnership interests.

Curtis/Palmer owns and operates a 58.8 MW hydroelectric facility located in Saratoga and Warren counties in New York. Applicants request confidential

treatment for the documents contained in Exhibits C-2 and I.

Comment date: June 21, 2001, in accordance with Standard Paragraph E at the end of this notice.

3. Thunderbird Generation, LLC

[Docket No. EG01-224-000]

Take notice that on June 5, 2001, Thunderbird Generation, LLC (Thunderbird), a limited liability company with its principal place of business at Thunderbird Generation, LLC, c/o Newport Generation, Inc., 100 Bayview Circle, Suite 500, Newport Beach, California 92660, filed with the Federal Energy Regulatory Commission (Commission) an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's regulations.

Thunderbird states that it will be engaged directly and exclusively in the business of owning a 900 MW natural gas fired, combined cycle electric generating facility and related assets to be located on an approximately 110 acre site near the town of Pink, Oklahoma in the southeast corner of Cleveland County, Oklahoma. Thunderbird will sell its capacity exclusively at wholesale.

Comment date: June 29, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

4. GWF Energy LLC

[Docket No. EG01-225-000]

Take notice that on June 5, 2001, GWF Energy LLC (the Applicant) whose address is 4300 Railroad Avenue, Pittsburgh, California 94565, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's regulations.

The Applicant states that it will be engaged directly and exclusively in the business of owning and/or operating three electric generating facilities to be located in Kings and San Joaquin Counties, California and selling electric energy at wholesale. The Applicant requests a determination that the Applicant is an exempt wholesale generator under Section 32(a)(1) of the Public Utility Holding Company Act of 1935.

Comment date: June 29, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.
