**Limited to equipment of no greater than 500 amperes.

***Limited to motors rated no greater than one-half horsepower.

Note: Testing and certification of gas operated equipment is limited to equipment for use with "liquefied petroleum gas" ("LPG" or "LP-Gas").

The designations and titles of the above test standards were current at the time of the preparation of the notice of the preliminary finding.

Many of the test standards listed above are approved as American National Standards by the American National Standards Institute (ANSI). However, for convenience in compiling the list, we show the designation of the standards developing organization (e.g., UL 1950) for the standard, as opposed to the ANSI designation (e.g., ANSI/UL 1950). Under our procedures, an NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard, regardless of which version appears in its list of test standards. Contact ANSI or the ANSI web site (www.ansi.org) and click "NSSN" to find out whether or not a standard is currently ANSI-approved.

None of the above standards had been withdrawn by the standards developing organization (SDO) at the time of the

preparation of the notice of preliminary finding.

Conditions

Entela, Inc. must also abide by the following conditions of the recognition, in addition to those already required by 29 CFR 1910.7:

OSHA must be allowed access to the ENT facilities and records for purposes of ascertaining continuing compliance with the terms of its recognition and to investigate as OSHA deems necessary;

If ENT has reason to doubt the efficacy of any test standard it is using under this program, it must promptly inform the organization that developed the test standard of this fact and provide that organization with appropriate relevant information upon which its concerns are based;

ENT must not engage in or permit others to engage in any misrepresentation of the scope or conditions of its recognition. As part of this condition, ENT agrees that it will allow no representation that it is either a recognized or an accredited Nationally Recognized Testing Laboratory (NRTL) without clearly indicating the specific equipment or material to which this recognition is tied, or that its recognition is limited to certain products;

ENT must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major changes in its operations as an NRTL, including details;

ENT will continue to meet all the terms of its recognition and will always comply with all OSHA policies pertaining to this recognition; and

ENT will continue to meet the requirements for recognition in all areas where it has been recognized.

Signed at Washington, D.C. this 15 day of June, 2001.

R. Davis Layne,

Acting Assistant Secretary.

BILLING CODE 7536-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-247]

Consolidated Edison Company of New York, Inc.; Indian Point Nuclear Generating Unit No. 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an amendment to Facility Operating License No. DPR-26, issued to Consolidated Edison Company of New York, Inc., (the licensee), for operation of the Indian Point Nuclear Generating Unit No. 2, located in Westchester County, New York.

Environmental Assessment

Identification of the Proposed Action

The proposed action would revise the facility Technical Specifications (TSs) to correct various editorial errors and make other administrative changes.

The proposed action is in accordance with the licensee's application for amendment dated February 14, 2000, as supplemented by letter dated May 3, 2001.

The Need for the Proposed Action

The proposed action corrects various editorial errors and makes other

administrative changes in the TSs. Specifically, the amendment makes administrative changes that revise: (a) TS Tables 3.6-1 and 4.4-1 to correct listing and editorial errors, (b) TS 3.8.B.10 to reflect the wording in 10 CFR 50.54(m)(2)(iv), (c) Figures 3.10-2 through 3.10-6 to remove these figures, (d) Table 4.1-1 to reflect change in level indication components, (e) TS 4.19.B and 6.14.1.1 to correct editorial errors, (f) TS 6.12.1 to reflect an organizational title change, and (g) TS 6.13.2 to correct a typographical error. In its May 3 letter, the licensee requested that the proposed changes to TS 6.12.1 regarding references to the current sections of 10 CFR Part 20 be withdrawn.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that the administrative and editorial changes correct errors that currently exist in the TSs. The proposed action does not modify the facility or affect the manner in which the facility is operated.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not involve any historic sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental
