

Pursuant to section 751(c)(6)(A)(iv) of the Act and 19 CFR 351.222(i)(2)(i), revocation is effective August 3, 2000, with respect to the antidumping duty order, and August 8, 2000, with respect to the countervailing duty order. The Department will instruct the Customs Service to discontinue the suspension of liquidation and collection of cash deposit rates on entries of the subject merchandise entered or withdrawn from warehouse on or after August 3, 2001, and August 8, 2000 (the effective dates). The Department will complete any pending administrative reviews of these orders and will conduct administrative reviews of subject merchandise entered prior to the effective date of revocation in response to appropriately filed requests for review.

Dated: July 6, 2001.

Faryar Shirzad,

Assistant Secretary for Import Administration.

International Trade Administration

[A-357-814]

Notice of Final Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products From Argentina

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: July 16, 2001.

FOR FURTHER INFORMATION CONTACT:

Constance Handley at (202) 482-0631 or David Bede at (202) 482-3693, respectively, Import Administration, Room 1870, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act) by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to Department of Commerce (the Department) regulations refer to the regulations codified at 19 CFR part 351 (April 2000).

Final Determination

We determine that certain hot-rolled carbon steel flat products (HRS) from Argentina are being, or are likely to be

sold, in the United States at less than fair value (LTFV), as provided in section 735 of the Act. The estimated margins of sales at LTFV are shown in the *Suspension of Liquidation* section of this notice.

Case History

The preliminary determination in this investigation was issued on April 23, 2001. See *Notice of Preliminary Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products from Argentina*, 66 FR 22180 (May 3, 2001) ("Preliminary Determination"). No case briefs were filed.¹ On May 16, 2001, Siderar Saic (Siderar) requested that the final determination be postponed. This request was denied. See *Memorandum from Gary Taverman to Faryar Shirzad: Request for Postponement of Final Determination* (June 19, 2001).

Scope of Investigation

For purposes of this investigation, the products covered are certain HRS of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers), regardless of thickness, and in straight length, of a thickness of less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm, but not exceeding 1250 mm, and of a thickness of not less than 4.0 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of this investigation.

Specifically included within the scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium or niobium (also commonly referred to as columbium), or both, added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, vanadium, and molybdenum. The substrate for motor lamination steels

contains micro-alloying levels of elements such as silicon and aluminum.

Steel products to be included in the scope of this investigation, regardless of definitions in the Harmonized Tariff Schedule of the United States (HTSUS), are products in which: (i) Iron predominates, by weight, over each of the other contained elements; (ii) the carbon content is 2 percent or less, by weight; and (iii) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 1.80 percent of manganese, or
- 2.25 percent of silicon, or
- 1.00 percent of copper, or
- 0.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 1.25 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.10 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.15 percent of vanadium, or
- 0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of this investigation unless otherwise excluded. The following products, by way of example, are outside or specifically excluded from the scope:

- Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including, *e.g.*, American Society for Testing and Materials (ASTM) specifications A543, A387, A514, A517, A506).
- Society of Automotive Engineers (SAE)/American Iron & Steel Institute (AISI) grades of series 2300 and higher.
- Ball bearing steels, as defined in the HTSUS.
- Tool steels, as defined in the HTSUS.
- Silico-manganese (as defined in the HTSUS) or silicon electrical steel with a silicon level exceeding 2.25 percent.
- ASTM specifications A710 and A736.
- USS abrasion-resistant steels (USS AR 400, USS AR 500).
- All products (proprietary or otherwise) based on an alloy ASTM specification (sample specifications: ASTM A506, A507).
- Non-rectangular shapes, not in coils, which are the result of having been processed by cutting or stamping and which have assumed the character of articles or products classified outside chapter 72 of the HTSUS.

The merchandise subject to this investigation is classified in the HTSUS at subheadings: 7208.10.15.00, 7208.10.30.00, 7208.10.60.00, 7208.25.30.00, 7208.25.60.00,

¹ Normally, when the Department issues a final determination, the **Federal Register** notice is accompanied by a separate Issues and Decision Memorandum. Since no briefs were filed in this case, a separate memorandum is not required.

7208.26.00.30, 7208.26.00.60, 7208.27.00.30, 7208.27.00.60, 7208.36.00.30, 7208.36.00.60, 7208.37.00.30, 7208.37.00.60, 7208.38.00.15, 7208.38.00.30, 7208.38.00.90, 7208.39.00.15, 7208.39.00.30, 7208.39.00.90, 7208.40.60.30, 7208.40.60.60, 7208.53.00.00, 7208.54.00.00, 7208.90.00.00, 7211.14.00.90, 7211.19.15.00, 7211.19.20.00, 7211.19.30.00, 7211.19.45.00, 7211.19.60.00, 7211.19.75.30, 7211.19.75.60, and 7211.19.75.90. Certain hot-rolled carbon steel flat products covered by this investigation, including vacuum degassed fully stabilized, high strength low alloy, and the substrate for motor lamination steel may also enter under the following tariff classification numbers: 7225.11.00.00, 7225.19.00.00, 7225.30.30.50, 7225.30.70.00, 7225.40.70.00, 7225.99.00.90, 7226.11.10.00, 7226.11.90.30, 7226.11.90.60, 7226.19.10.00, 7226.19.90.00, 7226.91.50.00, 7226.91.70.00, 7226.91.80.00, and 7226.99.00.00. Subject merchandise may also enter under 7210.70.30.00, 7210.90.90.00, 7211.14.00.30, 7212.40.10.00, 7212.40.50.00, and 7212.50.00.00.

Although the HTSUS subheadings are provided for convenience and U.S. Customs purposes, the written description of the merchandise subject to this proceeding is dispositive.

Period of Investigation

The period of investigation (POI) for this investigation is October 1, 1999 through September 30, 2000. This period corresponds to the four most recent fiscal quarters prior to the month of the filing of the petition (*i.e.*, November 2000).

Facts Available

In the preliminary determination, the Department based the dumping margin for Siderar on facts otherwise available pursuant to section 776(a)(2)(A) of the Act. The use of facts otherwise available was warranted because Siderar failed to respond to the Department's questionnaire, and failed to provide any indication that it was unable to respond. Therefore, the Department found that Siderar failed to cooperate by not acting to the best of its ability. As a result, pursuant to section 776(b) of the Act, the Department used an adverse inference in selecting from the facts available. Specifically, the Department assigned Siderar the highest margin alleged in the petition. We continue to find this margin corroborated, pursuant to section 776(c) of the Act, for the reasons discussed in the *Preliminary*

Determination. No interested parties have objected to the use of adverse facts available for Siderar in this investigation, nor to the Department's choice of the facts available margin. Accordingly, for the final determination, the Department is continuing to use, for Siderar, the highest margin alleged in the petition. *See Preliminary Determination*. In addition, the Department has left unchanged from the preliminary determination the "All Others Rate" in this investigation.

On January 17, 2001, the other mandatory respondent, Acindar Industria Argentina de Aceros SA (Acindar), informed the Department that it did not sell the subject merchandise to the United States during the period of investigation (POI) and, therefore, had no sales to report. Upon reviewing U.S. Customs data, the Department confirmed that Acindar did not sell the subject merchandise to the United States during the POI and, as such, any future exports from Acindar will be subject to the "All Others Rate."

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, we are directing the Customs Service to continue to suspend all entries of HRS from Argentina, that are entered, or withdrawn from warehouse, for consumption on or after May 3, 2001, the date of publication of our preliminary determination. The Customs Service shall require a cash deposit or bond equal to the dumping margin, as indicated in the chart below. These instructions suspending liquidation will remain in effect until further notice.

The dumping margins are provided below:

Manufacturer/exporter	Margin (percent)
Siderar Saic (Siderar)	44.59
All Others	40.60

ITC Notification

In accordance with section 735(d) of the Act, we have notified the International Trade Commission (ITC) of our determination. As our final determination is affirmative, the ITC will, within 45 days, determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all securities posted will be refunded or canceled. If the ITC determines that such injury

does exist, the Department will issue an antidumping duty order directing the Customs Service to assess antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

Notification Regarding APO

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This determination is issued and published pursuant to sections 735(d) and 777(i)(1) of the Act.

Dated: July 7, 2001.

Faryar Shirzad,

Assistant Secretary for Import Administration.
