ENVIRONMENTAL PROTECTION AGENCY

[OPP-34243; FRL-6789-3]

Thiophanate-methyl; Availability of Risk Assessments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of risk assessments that were developed as part of EPA's process for making pesticide Reregistration Eligibility Decisions (REDs) and tolerance reassessments consistent with the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA). These risk assessments are the human health and ecological risk assessments and related documents for thiophanate-methyl. This notice also starts a 60-day public comment period for the risk assessments. By allowing access and opportunity for comment on the risk assessments, EPA is seeking to strengthen stakeholder involvement and help ensure decisions made under FQPA are transparent and based on the best available information. The tolerance reassessment process will ensure that the United States continues to have the safest and most abundant food supply.

DATES: Comments, identified by the docket control number OPP-34243 for thiophanate-methyl, must be received on or before October 9, 2001.

¹ 18 CFR 385.2010.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit II. of the

SUPPLEMENTARY INFORMATION. To ensure proper receipt by EPA, it is imperative that you identify the docket control number for thiophanate-methyl, OPP-34243, in the subject line on the first page of your response.

If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

III. What Action is the Agency Taking?

EPA is making available to the public the risk assessments that have been developed as part of the Agency's interim public participation process for tolerance reassessment and reregistration. During the next 60 days, EPA will accept comments on the human health and ecological risk assessments and other related documents for thiophanate-methyl, available in the individual pesticide docket. Like other REDs for pesticides developed under the interim process, the Thiophanate-methyl RED will be made available for public comment.

EPA and USDA have been using a pilot public participation process for the assessment of organophosphate pesticides since August 1998. In considering how to accomplish the movement from the current pilot being used for the organophosphate pesticides to the public participation process that will be used in the future for non-organophosphates, such as thiophanate-methyl, EPA and USDA have adopted an interim public participation process. EPA is using this interim process in reviewing the non-organophosphate pesticides scheduled to complete tolerance reassessment and reregistration in 2001 and early 2002. The interim public participation process ensures public access to the Agency's risk assessments while also allowing EPA to meet its reregistration commitments. It takes into account that the risk assessment development work

on these pesticides is substantially complete. The interim public participation process involves: A registrant error correction period; a period for the Agency to respond to the registrant's error correction comments; the release of the refined risk assessments and risk characterizations to the public via the docket and EPA's internet website; a significant effort on stakeholder consultations, such as meetings and conference calls; and the issuance of the risk management decision document (i.e., RED) after the consideration of issues and discussions with stakeholders. USDA plans to hold meetings and conference calls with the public (i.e., interested stakeholders such as growers, USDA Cooperative Extension Offices, commodity groups, and other Federal government agencies) to discuss any identified risks and solicit input on risk management strategies. EPA will participate in USDA's meetings and conference calls with the public. This feedback will be used to complete the risk management decisions and the RED. EPA plans to conduct a close-out conference call with interested stakeholders to describe the regulatory decisions presented in the RED. REDs for pesticides developed under the interim process will be made available for public comment.

Included in the public version of the official record are the Agency's risk assessments and related documents for thiophanate-methyl. As additional comments, reviews, and risk assessment modifications become available, these will also be docketed. The thiophanate-methyl risk assessments reflect only the work and analysis conducted as of the time they were produced and it is appropriate that, as new information becomes available and/or additional analyses are performed, the conclusions they contain may change.
