## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[FERC Docket No. CP01-422-000, CA State Clearinghouse No. 2001071035, BLM Reference No. CA-17918]

### Kern River Gas Transmission Company; Notice of Intent/Preparation To Prepare a Joint Environmental Impact Statement/Report for the Proposed Kern River 2003 Expansion Project; Request for Comments on Environmental Issues and Notice of Public Scoping Meetings and Site Visit

August 20, 2001.

The staffs of the Federal Energy Regulatory Commission (FERC or Commission) and the California State Lands Commission (CSLC) will jointly prepare an environmental impact statement/report (EIS/EIR) that will discuss the environmental impacts of Kern River Gas Transmission Company's (KRG T) proposed Kern River 2003 Expansion Project in Wyoming, Utah, Nevada, and California.<sup>1</sup> The proposed facilities would consist of 634.3 miles of 36-inch-diameter pipeline, 82.4 miles of 42-inch-diameter pipeline, 0.8 mile of 12-inch-diameter pipeline, and 163,700 horsepower (hp) of additional compression. The FERC will use the EIS/EIR in its decision-making process to determine whether the project is in the public convenience and necessity. The CSLC will use the document to consider KRG T's application for leasing the State's School Lands for the pipeline.

The FERC will be the lead Federal agency in the preparation of the EIS/EIR while the CSLC will be the State Lead Agency for California. The joint document, which will avoid much duplication of environmental analyses, will satisfy the requirements of both the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA).

The proposed project would cross about 322.1 miles of Bureau of Land Management (BLM) land and 19.4 miles of the Dixie National Forest, which is under the jurisdiction of the Forest Service (FS). KRG T has filed a right-of-way application with the BLM and a special use permit application with the FS for the crossings of these Federal lands. As part of considering KRG T's applications, the BLM and the FS, Dixie National Forest have agreed to meet their NEPA responsibilities by

participating as cooperating agencies in the preparation of the EIS/EIR.

This notice is being sent to landowners along KRG T's existing mainline and its proposed and alternative routes; Federal, state, and local government agencies; elected officials; environmental and public interest groups; Indian tribes that might attach religious and cultural significance to historic properties in the area of potential effect; local libraries and newspapers; other interested parties; and the FERC's official service list. Government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern. Additionally, with this notice we<sup>2</sup> are asking other Federal, state, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues to cooperate with us in the preparation of the EIS/EIR. These agencies may choose to participate once they have evaluated KRG T's proposal relative to their responsibilities. Agencies who would like to request cooperating status should follow the instructions for filing comments described later in this notice.

If you are a landowner receiving this notice, you may be contacted by a KRG T representative about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The pipeline company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the FERC, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings in accordance with applicable state laws in Wyoming, Utah, Nevada, and California.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility on My Land? What Do I Need To Know?" should have been attached to the project notice KRG T provided to landowners. This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the FERC's proceedings. It is available for viewing on the FERC Internet website (<http://www.ferc.gov>).

## Summary of the Proposed Project

KRG T proposes to build new natural gas pipeline and compression facilities to transport approximately 886 million cubic feet per day of natural gas from the Central Rocky Mountain region to

<sup>1</sup> KRG T's application in Docket No. CP01-422-000 was filed with the FERC under Sections 7(b) and 7(c) of the Natural Gas Act and Part 157 of the FERC's regulations.

<sup>2</sup> "We," "us," and "our" refer to the staffs of the FERC's Office of Energy Projects and the CSLC.
