Although other uses of dimethoate on broccoli, Brussel sprouts, cabbage, cauliflower, collards, kale and mustard greens have been registered sites for residues of dimethoate under the Federal Food, Drug and Cosmetic Act (FFDCA), FIFRA Section 2(z)(bb), the use on cabbage, Chinese (bok choy) and kohlrabi represent an unreasonable adverse effect on the environment, as they could result in human dietary risk from the residues resulting from the use of dimethoate in or on food consistent with the standard under Section 408 of FIFRA. As such the Agency is hereby waving the 180-day comment period normally given for the deletion of a minor agricultural use in accordance with FIFRA section 6(f)(1)(c). The Agency has determined that, while these actions require publication for the purpose of announcement, a comment period is not warranted. The following Table 2 includes the names and addresses of record for the registrants of the products listed in Table 1.
