

Line Project, Construct a New 500-kilovolt (kV) Transmission Line, COE Section 10 and 404 Permits, (DOE/EIS-0317), King County, WA.

Summary

EPA expressed objections regarding the project's potential impacts to the Cedar River watershed and to endangered species. EPA requested that the final EIS provide information to fully evaluate these impacts, that it consider a broader range of alternatives, and that it discuss compliance with the Clean Water Act's antidegradation requirement.

Summary

EPA has no objections to the draft EIS. It provides a framework for deciding policy directions, rather than describing the impacts of a particular action or set of actions that will result from the document. Agencies with jurisdiction in the Columbia River Basin will, however, have to individually address Fish and Wildlife recovery plans in stand alone NEPA documents in order to comply with the 2000 Biological Opinion for the Federal Columbia River Power System.
