

to the distribution of the 2000 satellite fees. For the reasons stated herein, comments on the existence and extent of controversy over the distribution of the 2001 satellite royalty fees are premature and will not be considered at this time.

In Phase I of a satellite royalty distribution, royalties are distributed to certain categories of broadcast programming that has been retransmitted by satellite carriers. The categories have traditionally been syndicated programming and movies, sports, commercial and noncommercial broadcaster-owned programming, religious programming, and music programming. The Office seeks comments as to controversies between these categories for royalty distribution.

In Phase II of a satellite royalty distribution, royalties are distributed to claimants within a program category. If a claimant anticipates a Phase II controversy, the claimant must state each program category in which he or she has an interest that has not, by the end of the comment period, been satisfied through a settlement agreement.

The Copyright Office must be advised of the existence and extent of all Phase I and Phase II controversies by the end of the comment period. It will not consider any controversies that come to our attention after the close of that period.

3. Motion of Public Broadcasting Service for Distribution of PBS National Satellite Feed Royalty Funds for Calendar Years 2000 and 2001

On June 21, 2001, PBS filed a motion for distribution of PBS national satellite feed royalty fees for calendar years 2000 and 2001 and sent a copy of the motion to those entities that have participated in past satellite distribution proceedings. The Office has determined that, as a matter of law, consideration of a distribution of the 2001 satellite royalty fees is premature. A distribution of the 2001 satellite royalty fees cannot occur until those persons who are entitled to a share of the royalties have an opportunity to file their claims with the Copyright Office. Claims to the 2001 satellite royalty fees will not be filed with the Copyright Office until the month of July, 2002. See 17 U.S.C. 119(b)(4). Consequently, the Office will consider the motion only so far as it concerns the distribution of the 2000 satellite royalty fees and only after all interested parties have been identified by filing the Notices of Intention requested herein and such parties have had an opportunity to respond to the motion.

A claimant who is not a party to the motion may file a response to the motion no later than the due date set forth in this notice, provided that the respondent files a Notice of Intention to Participate in this proceeding in accordance with this notice. The PBS motion for distribution of PBS national satellite feed royalty funds for 2000–2001 is posted on the Copyright Office Web site (<http://www.loc.gov/copyright/carp/pbsmotion.pdf>) and is available for copying in the Office of the General Counsel. Additional responsive filings are also available for copying in the Office of the General Counsel.

Dated: October 17, 2001.

David O. Carson,

General Counsel.

NUCLEAR REGULATORY COMMISSION

Consideration of approval of a Decommissioning Plan for the Kaiser Aluminum and Chemical Corporation Facility in Tulsa, Oklahoma, and an Opportunity for a Hearing

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Consideration of Approval of a Decommissioning Plan for the Kaiser Aluminum and Chemical Corporation Facility in Tulsa, Oklahoma, and an opportunity for a hearing.

The U.S. Nuclear Regulatory Commission (NRC) is considering approval of the Phase 2 Decommissioning Plan (DP) for the Kaiser Aluminum and Chemical Corporation (Kaiser) Facility in Tulsa, Oklahoma. Decommissioning of the Kaiser facility is being conducted in two Phases. In Phase 1, Kaiser remediated the land adjacent to the Kaiser property. In Phase 2, Kaiser will remediate its facility. On May 25, 2001, Kaiser submitted the Phase 2 DP. NRC performed an acceptance review, and on August 7, 2001, notified Kaiser that the information provided in the DP was sufficient to begin a technical review.

Contamination at the Kaiser facility consists of metallic dross/soil containing Th-228, Th-230, and Th-232, generated from smelting and manufacturing processes conducted from 1958 through 1970. The Phase 2 DP identifies the decommissioning activities that will be undertaken to remediate the Kaiser facility and make the site suitable for unrestricted release.

The NRC will require Kaiser to remediate its facility to meet NRC's decommissioning criteria in 10 CFR part 20, subpart E, "Radiological Criteria for License Termination," and during the decommissioning activities, to maintain effluents and doses within NRC requirements, and as low as reasonably achievable.

Prior to approving the DP, NRC will make findings in accordance with the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety
