

DATES: RUS and Georgia Transmission Corporation will conduct a scoping meeting in an open house format from 3 P.M. until 8 P.M. on Thursday, November 15, 2001.

ADDRESSES: The meeting will be held at the Carrollton Parks Recreation and Cultural Arts Center in the Optimist Room located at 118 South White Street, in Carrollton, Georgia 30117, phone (770) 832-1161. The purpose of the meeting is to provide information to the public and solicit comments.

FOR INFORMATION CONTACT: Bob Quigel, Engineering and Environmental Staff, Rural Utilities Service, Stop 1571, 1400 Independence Avenue, SW., Washington, DC 20250-1571, telephone (202) 720-0468. Mr. Quigel's e-mail address is bquigel@rus.usda.gov. You can also contact Ms. Analee Mayes at Georgia Transmission Corporation at (770) 270-7030. Ms. Mayes' e-mail address is pbctr1@gatrans.com.

SUPPLEMENTARY INFORMATION: Two separate transmission lines are being proposed. A separate environmental assessment will be prepared for each transmission line. Georgia Transmission Corporation proposes to construct a 230 kV transmission between the Yellowdirt Switching Station at Plant Wansley in Heard County to the proposed Hickory Level Substation in Carroll County. (The Hickory Level Substation is anticipated to be in service by 2002 as it is a needed system improvement regardless of the 230 kV transmission line described herein.) Concrete or steel single pole structures ranging in height from 90 to 130 feet would support the conductors and would require a right-of way of approximately 100 feet. The approximate length of the line is 25 miles. It is anticipated that this transmission line would be in service in the spring of 2004. Georgia Transmission Corporation proposes to construct a 500 kV transmission line from the existing substation at Plant Wansley in Heard County to the existing Villa Rica #2 Substation east of Villa Rica, in Douglas County. Lattice steel structures would be used to support the conductors for the length of the project. The heights of these structures typically range from 80 to 150 feet and require a right-of-way width of 180 feet. The approximate length of the line is 30 miles. It is anticipated that this transmission line would be in service by the spring of 2008.

Alternatives considered by RUS and Georgia Transmission Corporation include: (a) No action, (b) alternative transmission improvements, and (c) alternative transmission line corridors. An Alternative Evaluation Study and

Macro Corridor Study Report, prepared by Georgia Transmission Corporation, will be presented at the public scoping meetings. The report is available for public review at RUS at the address provided in this notice, at Georgia Transmission Corporation, 2100 East Exchange Place, Tucker, Georgia 30085 and at:

Government agencies, private organizations, and the public are invited to participate in the planning and analysis of the proposed project. Representatives from RUS and Georgia Transmission Corporation will be available at the scoping meetings to discuss RUS's environmental review process, describe the project, the need for the project, and macro corridors under consideration, and discuss the scope of environmental issues to be considered, answer questions, and accept oral and written comments. Written comments will be accepted for 30 days after the public scoping meeting. Written comments should be sent to RUS at the address provided in this notice.

From information provided in the alternative evaluation and site selection study, input that may be provided by government agencies, private organizations, and the public, Georgia Transmission Corporation will prepare an environmental analysis to be submitted to RUS for review. RUS will use the environmental analysis to determine the significance of the impacts of the project and may adopt it as its environmental assessment of the project. RUS' environmental assessment of the project would be available for review and comment for 30 days.

Should RUS determine, based on the environmental assessment of the project, that the impacts of the construction and operation of the plant

would not have a significant environmental impact, it will prepare a finding of no significant impact. Public notification of a finding of no significant impact would be published in the **Federal Register** and in newspapers with a circulation in the project area.

Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with environmental review requirements as prescribed by CEQ and RUS environmental policies and procedures.

Dated: October 23, 2001.

Acting Director, Engineering and Environmental Staff.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

October 25, 2001.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Uruguay Round Agreement on Textiles and Clothing (ATC), you are directed to prohibit, effective on January 1, 2002, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Costa Rica and exported during the twelve-month period beginning on January 1, 2002 and extending through December 31, 2002, in excess of the following restraint limits:

Category	Twelve-month limit
340/640	1,541,941 dozen.
342/642	569,217 dozen.
347/348	2,598,514 dozen.
443	230,083 numbers.
447	12,405 dozen.

The limits set forth above are subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body.

Products in the above categories exported during 2001 shall be charged to the applicable category limits for that year (see directive dated December 13, 2000) to the extent of any unfilled balances. In the event

the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

Also pursuant to the ATC, and under the terms of the Special Access Program, as set forth in 63 FR 16474 (April 3, 1998), you are directed to establish guaranteed access levels for properly certified cotton, wool and man-made fiber textile products in the following categories which are assembled in Costa Rica from fabric formed and cut in the United States and re-exported to the United States from Costa Rica during the period beginning on January 1, 2002 and extending through December 31, 2002:

Category	Guaranteed access level
340/640	650,000 dozen.

347/348	1,500,000 dozen.
443	200,000 numbers.
447	4,000 dozen.

Any shipment for entry under the Special Access Program which is not accompanied by a valid and correct certification in accordance with the provisions of the certification requirements established in the directive of May 15, 1990 (55 FR 21074), as amended, shall be denied entry unless the Government of Costa Rica authorizes the entry and any charges to the appropriate specific limit. Any shipment which is declared for entry under the Special Access Program but found not to qualify shall be denied entry into the United States.

These specific limits and guaranteed access levels do not apply to goods that qualify for quota-free entry under the Trade and Development Act of 2000.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.
