Federal Energy Regulatory Commission

[Docket No. ER01-3055-001]

Eagle Point Cogeneration Partnership; Notice of Filing

November 20, 2001.

Take notice that on November 16, 2001, Eagle Point Cogeneration Partnership (Eagle Point), filed with the Federal Energy Regulatory Commission (Commission) a revised tariff with provisions that: (1) prohibits power sales to, or purchases from, an affiliated public utility with a franchised service territory absent the filing for separate authorization under section 205 of the Federal Power Act; and (2) establishes the pricing parameters for the reassignment of excess transmission capacity. Further, Eagle Point requested a shortened notice period and expedited consideration of its application in this proceeding.

Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before November 30, 2001. Protests will be considered by the Commission to determine the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Commission's web site at <http://www.ferc.gov> using the "RIMS" link, select "Docket#" and follow the instructions (call 202-208-2222 for assistance). Comments, protests and interventions may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the

instructions on the Commission's web site under the "e-filing" link.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL01-118-000]

Before Commissioners: Pat Wood, III, Chairman; William L. Massey, Linda Breathitt, and Nora Mead Brownell; Investigation of Terms and Conditions of Public Utility Market-Based Rate Authorizations; Order Establishing Refund Effective Date and Proposing To Revise Market-Based Rate Tariffs and Authorizations

Issued November 20, 2001.

I. Introduction

In this order, the Commission institutes a proceeding pursuant to section 206 of the Federal Power Act (FPA)¹ to investigate the justness and reasonableness of the terms and conditions of market-based rate tariffs and authorizations² of public utilities that sell electric energy and ancillary services at wholesale in interstate commerce. As discussed below, the Commission proposes to revise all existing market-based rate tariffs and authorizations to condition all public utility sellers' market-based rate authority to ensure that such rates remain just and reasonable and do not become unjust or unreasonable as a result of anticompetitive behavior or abuse of market power. The Commission intends to condition all new market-based rate tariffs and authorizations in a similar manner. The proposed condition, including the refund effective date, will protect customers from excessive rates and charges resulting from anticompetitive behavior or abuse of market power, as discussed more fully below.

Independently, in light of numerous concerns raised by market participants in cases involving market-based rates, the Commission intends to review its approach to evaluating market-based rate applications. The Commission will in the near future hold a series of

outreach meetings with industry experts. The Commission expects that such meetings will inform a generic rulemaking proceeding on potential new analytical methods for assessing markets and market power. In addition, the Commission has initiated a proceeding on market design and market structure to reform open access transmission tariffs and standardize market design rules as appropriate.

II. Discussion

In an order issued on November 1, 2000, we found that the "electric market structure and market rules for wholesale sales of electric energy in California were seriously flawed and that these structures and rules, in conjunction with an imbalance of supply and demand in California, have caused, and continue to have the potential to cause, unjust and unreasonable rates for short-term energy * * * under certain conditions."³ In a series of subsequent orders, the Commission reiterated those earlier findings and, among other things, established conditions, including refund liability, on sellers' market-based rate authority to prevent anticompetitive bidding behavior.⁴ In its June 19 Order, the Commission stated that abuse of market power cannot and will not be tolerated, that sellers will be subject to losing their market-based rates for engaging in anti-competitive conduct, and that "as a condition of continued authorization of market-based rates, public utility sellers in the WSCC [Western Systems Coordinating Council] must agree to refunds, with interest pursuant to 18 CFR 35.19a, of any overcharges resulting from anticompetitive bidding or behavior."⁵

Based on our recent experience involving wholesale electric markets in California and the rest of the WSCC, and consistent with our intention to review the Commission's approach to evaluating market-based rate applications and also to explore generic transmission and market design protocols, we believe it is necessary and appropriate to impose a tariff condition on all public utility sellers with market-based rate authority. This tariff condition, described more fully below, will ensure that rates collected pursuant
