Antidumping Duty Order

In accordance with section 735(a) of the Act, the Department made its final determination that certain hot-rolled carbon steel flat products (hot-rolled steel) from Thailand is being sold at less-than-fair-value (LTFV). *See Notice of Final Determination of Sales at Less Than Fair Value; Certain Hot-Rolled Carbon Steel Flat Products from Thailand*, 66 FR 49622 (September 28, 2001). On November 13, 2001, the U.S. International Trade Commission (the ITC) notified the Department of its final determination, pursuant to section 735(b)(1)(A)(i) of the Act, that an industry in the United States is materially injured by reason of LTFV imports of subject merchandise from Thailand.

In accordance with section 736(a)(1) of the Act, the Department will direct Customs officers to assess, upon further advice by the Department, antidumping duties equal to the amount by which the normal value of the subject merchandise exceeds the U.S. price of the subject merchandise for all relevant entries of hot-rolled steel from Thailand. These antidumping duties will be assessed on all unliquidated entries of hot-rolled steel from Thailand entered, or withdrawn from warehouse, for consumption on or after May 3, 2001, the date on which the Department published its notice of preliminary determination for this investigation in the **Federal Register**. *See Notice of Preliminary Determination of Sales at Less Than Fair Value; Certain Hot-Rolled Carbon Steel Flat Products from Thailand*, 66 FR 22199, (May 3, 2001).

On or after the date of publication of this notice in the **Federal Register**, Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins:

Manufacturer/exporter	Cash deposit rate (In percent)
Sahaviriya Steel Industries	4.44
Siam Strip Mill Public	20.30
All Others	4.44

The "All Others" rates apply to all exporters in Thailand of subject merchandise not specifically listed.

Article VI.5 of the General Agreement on Tariffs and Trade (GATT 1994) prohibits assessing dumping duties on the portion of the margin attributable to an export subsidy. In this case, the product under investigation is subject to a countervailing duty investigation. *See*

Notice of Final Affirmative Countervailing Duty Determination: Certain Hot-Rolled Carbon Steel Flat Products from Thailand, 66 FR 50410 (October 3, 2001).

Therefore, for all entries of hot-rolled steel from Thailand entered, or withdrawn from warehouse, for consumption on or after the date on which the order in the companion countervailing duty investigation is published in the **Federal Register**, we will request for duty deposit purposes that the Customs Service deduct the portion of the margin attributable to export subsidies as determined in the countervailing duty investigation. The antidumping duty cash deposit rates, as adjusted for export subsidies, are as follows:

Manufacturer/exporter	Margin (In percent)
Sahaviriya Steel Industries	3.86
Siam Strip Mill Public	19.72
All Others	3.86

This notice constitutes the antidumping duty order with respect to hot-rolled steel from Thailand. Interested parties may contact the Department's Central Records Unit, room B-099 of the main Commerce building, for copies of an updated list of the antidumping duty orders currently in effect.

This order is published in accordance with section 736(a) of the Act.

Dated: November 21, 2001.

Assistant Secretary for Import Administration.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Tariff Act), are to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations codified at 19 CFR part 351 (April 1, 2000).

Scope of the Order

The products covered by this order are certain hot-rolled carbon steel flat products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers), regardless of thickness, and in straight lengths of a thickness of less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm, but not exceeding 1250 mm, and of a thickness of not less than 4.0 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of these investigations.

Specifically included within the scope of these investigations are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium or niobium (also commonly referred to as columbium), or both, added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum.

Steel products to be included in the scope of these investigations, regardless of definitions in the Harmonized Tariff Schedule of the United States (HTSUS), are products in which: (i) Iron predominates, by weight, over each of the other contained elements; (ii) the carbon content is 2 percent or less, by weight; and (iii) none of the elements

listed below exceeds the quantity, by weight, respectively indicated:

- 1.80 percent of manganese, or
- 2.25 percent of silicon, or
- 1.00 percent of copper, or
- 0.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 1.25 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.10 percent of molybdenum, or
- 0.10 percent of niobium, or
- 0.15 percent of vanadium, or
- 0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of these investigations unless otherwise excluded. The following products, by way of example, are outside or specifically excluded from the scope of these investigations:

- Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including, *e.g.*, American Society for Testing and Materials (ASTM) specifications A543, A387, A514, A517, A506).
- Society of Automotive Engineers (SAE)/American Iron & Steel Institute (AISI) grades of series 2300 and higher.
- Ball bearing steels, as defined in the HTSUS.

Antidumping Duty Orders

In accordance with section 735(a) of the Tariff Act, the Department made its final determination that certain hot-rolled carbon steel flat products from Taiwan are being sold at less than fair value. *See Notice of Final Determination of Sales at Less Than Fair Value: Certain Hot-rolled Carbon Steel Flat Products from Taiwan*, 66 FR 49617, September 28, 2001. On November 13, 2001, the International Trade Commission (the Commission) notified the Department of its final determination pursuant to section 735(b)(1)(A)(i) of the Tariff Act that an industry in the United States is materially injured by reason of less-than-fair-value imports of subject merchandise from Taiwan.

Therefore, in accordance with section 736(a)(1) of the Tariff Act, the Department will direct Customs officers to assess, upon further advice by the Department, antidumping duties equal to the amount by which the normal value of the merchandise exceeds the export price (or constructed export price) of the merchandise for all relevant entries of certain hot-rolled carbon steel flat products from Taiwan. These antidumping duties will be assessed on all unliquidated entries of certain hot-rolled carbon steel flat products from Taiwan entered, or withdrawn from warehouse, for consumption on or after May 3, 2001, the date on which the Department published its notice of preliminary determination in the **Federal Register**

(66 FR 22204). Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins as noted below.
